DEPARTMENT OF EDUCATION OF THE CITY OF NEW YORK
JOEL I. KLEIN, Chancellor
OFFICE OF THE CHANCELLOR
52 Chambers Street, New York, New York 10007

October 31, 2009

TO: The Citizens, taxpayers, customers, investors and creditors of The City of New York

SUBJECT: ANNUAL FINANCIAL STATEMENTS FOR THE FISCAL YEAR ENDED JUNE 30, 2009

The Annual Financial Statements for the Department of Education of the City of New York (the "DOE") for the fiscal year ended June 30, 2009 are submitted herewith and include a Management's Discussion and Analysis, Financial Statements, Notes to the Financial Statements and supplemental schedules. We believe it is complete and accurate in all material aspects; that it is presented in accordance with accounting standards designed to set forth fairly the financial position and results of operations of the DOE as measured by the financial activity of its various funds; and that all disclosures necessary to enable the reader to gain the appropriate understanding of the DOE's financial affairs have been included. Responsibility for completeness and clarity of the report, including disclosures, rests with the Chancellor, the Deputy Chancellor for the Office of Infrastructure and Portfolio Planning, the Chief Operating Officer, and the Executive Director of the Division of Financial Operations. The Chief Administrator of the Office of Accounting of the Division of Financial Operations, who is responsible for the data presented herein, prepares the Annual Financial Statements.

The firm of Deloitte & Touche LLP has audited the 2009 financial statements included in this report; their opinion is expressed on page 1. The auditors' report on the basic financial statements is unqualified and states that the financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, known as Generally Accepted Accounting Principles (GAAP). The auditors' report on internal controls over financial reporting and on compliance and other matters, based on an audit of the financial statements performed in accordance with *Government Auditing Standards*, is also included. This report indicates that the auditors' tests did not identify any deficiencies in internal control over financial reporting that are considered to be material weaknesses nor did their tests disclose any instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*. In addition, the Management's Discussion and Analysis is included as supplementary information required by GAAP. Such information has not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, no audit opinion is expressed on it. The Supplemental Financial Schedules of the General Fund are presented for purposes of additional analysis and are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

On June 12, 2002 Governor George Pataki signed school governance legislation that removed accountability for the oversight of the City's public schools from an appointed seven member Board of Education to the Mayor. As a result of this governance change, the Board of Education is now known as the Department of Education of The City of New York, with a Chancellor who is appointed by the Mayor and who is accountable to him. Although there has been a change in the title of our public school system and its reporting relationship, the legal entity remains as the Board of Education of the City of New York.

The DOE is organized and administered in accordance with the provisions of the State of New York Education Law and consists of five Integrated Service Centers (ISC) and four Children First Networks (CFN) across the City of New York (The City). Each geographic ISC includes approximately three hundred and five schools. Each ISC contains up to six community school districts, as well as high schools located within its geographic boundaries. The primary goal of the ISCs and CFNs is to provide support services to the schools in the areas of business, operations and special education. In partnership with School Support Organization (SSOs), school communities are able to focus more energy to providing the highest quality educational services to City school students. ISC professional staff members work directly with principals to ensure that the services provided are effectively delivered to the schools.

The DOE is dependent upon The City for appropriations (spending authority) and does not have the authority to levy taxes or issue debt. As part of the DOE's dependent relationship with The City, The City incurs certain costs on behalf of the DOE that are not allocated to the DOE. Accordingly, these costs are not reflected in the accompanying financial statements. These costs are included in The City's fiscal year budget appropriations and include debt service costs and pension costs (allocated for the Teachers Retirement System and the Board of Education Retirement System) for tax levy funded employee services.

The DOE has two basic sources of funding:

- *Tax Levy and unrestricted Federal and State aid:* This includes revenue from City taxes (real estate, income, sales, etc.), New York State formula aid, and certain Federal and State Aid resources (e.g., impact aid and school lunch subsidies, etc.).
- *Federal and State categorical funds:* This category includes revenues received from the Federal and New York State governments under programs that are categorical in nature and whose expenditures are restricted by terms and conditions designated by the funding agency. Reimbursement claims for such revenues are made by the DOE to the funding sources based on actual expenditures and on compliance with funding source guidelines.

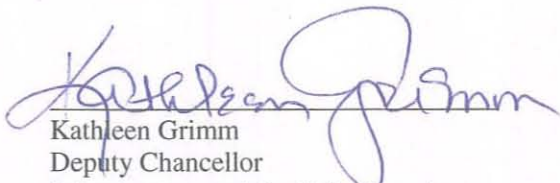

The DOE maintains, for its reporting purposes, a computerized accounting system to interface with The City's Financial Management System (FMS). The DOE Financial Accounting Management Information System (FAMIS) provides a relational database technology allowing the DOE to take advantage of current technology to conduct business in the most cost-effective and user-friendly manner. All of the DOE's financial transactions are processed through FMS. Effective July 2007, the control and timing of the DOE's Other Than Personal Service (OTPS) transactions changed so that such transactions initially pass all FMS edits prior to posting in FAMIS. FMS maintains the official accounting records for The City.

Management of the DOE is responsible for establishing and maintaining an internal control structure. In developing and evaluating the DOE's accounting system, consideration is given to the adequacy of internal controls. Internal controls are designed to provide reasonable, but not absolute, assurance regarding: (1) the safeguarding of assets against loss from unauthorized use or disposition; and (2) the reliability of financial records for preparing financial statements and maintaining accountability for assets. The concept of reasonable assurance recognizes that: (1) the cost of controls should not exceed the benefits expected to be derived; and (2) the evaluation of costs and benefits requires estimates and judgments by management.

In accordance with the DOE's status as a dependent school district, revenues received for school purposes are required to be deposited into The City's Treasury, which is maintained for the General Fund. As revenues are collected, they are recorded to a series of designated revenue codes established for the DOE. At the beginning of each fiscal year the estimated value of the revenue expected to be recognized during the fiscal year is used to establish the authorized spending level of the DOE. Budget requests and budget modifications for the use of these revenues are submitted by the DOE to The City's Office of Management and Budget (OMB) for review and approval. Approved budgets and budget modifications are entered by OMB into FMS; the DOE enters budgets and budget modifications into its accounting system (FAMIS).

The DOE is responsible for pre-auditing its own expenditures, which are then transmitted electronically to FMS. Based on the electronic transmission of expenditure data, and FMS pre-approval of OTPS transactions, the New York City Comptroller on behalf of the DOE makes disbursements for these expenditures. The actual vouchers and supporting documentation are maintained and reviewed at the schools or the central processing bureaus of the DOE. On an ongoing basis, and at the closing of the fiscal year, the two accounting systems (FAMIS and FMS) are reconciled.

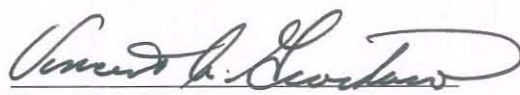

Respectfully submitted by,

Kathleen Grimm
Deputy Chancellor
Infrastructure and Portfolio Planning

Photine Anagnostopoulos
Chief Operating Officer

INDEPENDENT AUDITORS' REPORT

The Department of Education
of The City of New York

We have audited the accompanying financial statements of the governmental activities of the Department of Education of The City of New York (the "DOE") as of and for the years ended June 30, 2009 and 2008. These financial statements are the responsibility of the DOE management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the DOE's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As described in the Note 1A to the financial statements, the financial statements of the DOE are intended to present the financial position, and the changes in financial position, where applicable, of only that portion of the governmental activities, each major fund, and the aggregate remaining fund information of The City of New York (The City) that is attributable to the transactions of the DOE. They do not purport to, and do not present fairly, the financial position of The City as of June 30, 2009 and 2008, and the changes in its financial position, where applicable, for the years then ended in conformity with accounting principles generally accepted in the United States of America.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the DOE, as of June 30, 2009 and 2008, and the respective changes in financial position, where applicable, thereof for the years then ended in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the fiduciary funds of the DOE, as of June 30, 2009 and 2008, and the respective changes in financial position, where applicable, thereof for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As described in Note 1 to the financial statements, in 2009, the DOE adopted Governmental Accounting Standards Board Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*.

The Management's Discussion and Analysis on pages 4 through 11 is not a required part of the basic financial statements but is supplementary information required by the Governmental Accounting Standards Board. This supplementary information is the responsibility of the DOE's management. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Our audits were conducted for the purpose of forming opinions on the DOE's respective financial statements that collectively comprise the DOE's basic financial statements. The accompanying financial information listed as Supplemental Financial Schedules of the General Fund, in the foregoing table of contents, is presented for purposes of additional analysis and is not a required part of the basic financial statements. This supplementary information is the responsibility of the DOE's management. Such financial information has been subjected to the auditing procedures applied by us in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

In accordance with *Government Auditing Standards*, we have also issued our report dated October 23, 2009, on our consideration of the DOE's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The information contained in Section I (Introductory Section) of the table of contents is presented for purposes of additional analysis and is not a required part of the financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on it.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Department of Education
of The City of New York

We have audited the accompanying financial statements of the Department of Education of The City of New York (the "DOE") as of and for the year ended June 30, 2009, and have issued our report thereon dated October 23, 2009, which contains an explanatory paragraph regarding the adoption of Governmental Accounting Standards Board Statement ("GASB") No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. As described in the notes to the financial statements, the financial statements of the DOE are intended to present the financial position and changes in financial position, where applicable, of only that portion of the governmental activities, each major fund, and the aggregate remaining fund information of The City of New York ("The City") that is attributable to the transactions of the DOE. They do not purport to, and do not present fairly, the financial position of The City as of June 30, 2009, and the changes in its financial position, where applicable, for the year then ended in conformity with accounting principles generally accepted in the United States of America.

INTERNAL CONTROL OVER FINANCIAL REPORTING

In planning and performing our audit, we considered the DOE's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the DOE's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the DOE's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

COMPLIANCE AND OTHER MATTERS

As part of obtaining reasonable assurance about whether the DOE's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the DOE in a separate letter dated October 23, 2009.

This report is intended solely for the information and use of The New York City Audit Committee, management of the DOE and The City of New York, federal awarding agencies, and pass-through entities and is not intended to be and should not be used by any one other than these specified parties.

Deloitte + Touche LLP

October 23, 2009

Department of Education of The City of New York Management's Discussion and Analysis

This section of the DOE's Annual Financial Statements discusses and analyzes the DOE's financial performance during the fiscal years ended June 30, 2009 and 2008. Please read it in conjunction with the transmittal letter at the beginning of these financial statements and with the DOE's financial statements, which immediately follow this section.

Financial Highlights

- Net deficit at year-end was \$5.7 billion, a change in net assets of \$1.1 billion over that of the previous year.
- Total assets and liabilities reported in the governmental funds at year-end were \$2.9 billion, an increase of about \$34 million from that of the previous fiscal year.
- General Fund total revenues available and spent during the fiscal year were \$18 billion, an increase of 5.5 percent over that of the previous fiscal year.
- A net surplus of \$114.7 million was returned to The City, as part of the DOE's dependent relationship, to supplement revenues received from federal, state and private sources.

Overview of Financial Statements

The financial statements consist of three parts: Management's Discussion and Analysis (this part), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements that present different views of the DOE.

- The first four statements are "Department-wide Financial Statements" that provide both short-term and long-term information about the DOE's overall financial status.
- The remaining statements are "Fund Financial Statements" that focus on individual parts of the DOE, reporting its operations in more detail than the Department-wide financial statements.

The fund financial statements report the results of operations of two funds:

- The governmental funds statements explain how basic services such as regular and special education were financed in the short term.
- The fiduciary funds statement provides information about the financial relationships in which the DOE acts solely as an agent for the benefit of others.

The financial statements also include notes that explain data in the statements and provide more detailed information. The statements are followed by a section of required supplementary information that further explains and supports the financial statements with a comparison of the DOE's budget for the year.

The following summarizes the major features of the DOE's financial statements, including the portion of the DOE's activities they cover and the types of information they contain. The remainder of this overview section of Management's Discussion and Analysis highlights the structure and contents of each of the statements.

**Department of Education of The City of New York
Management’s Discussion and Analysis**

	Department-wide Statements	Fund Financial Statements Governmental Funds	Fiduciary Funds
Scope	Entire DOE (except fiduciary funds)	The activities of the DOE that are not fiduciary, such as special education and building maintenance	Instances in which the DOE administers resources on behalf of someone else, such as student activities monies
Required financial information	Statement of Net Assets and Statement of Activities	Balance Sheet and Statement of Revenues, Expenditures and Changes in Fund Balances	Statement of Fiduciary Net Assets
Accounting basis and measurement focus	Accrual accounting and economic resources focus	Modified accrual accounting and current financial focus	Accrual accounting and economic resources focus
Type of asset/liability information	All assets and liabilities, both financial and capital, short-term and long-term	Generally, asset usage and liabilities that come due during the year or soon thereafter; no capital assets or long-term liabilities included	All assets and liabilities, both short-term and long- term
Type of inflow/out flow information	All revenues and expenses during the year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and the related liability is due and payable	All additions and deductions during the year, regardless of when cash is received or paid

Department-wide Financial Statements

The Department-wide Financial Statements report information about the DOE as a whole using accounting methods similar to those used by private-sector companies.

The Statement of Net Assets includes all the DOE’s assets and liabilities. All of the current year’s revenues and expenses are accounted for in the Statement of Activities regardless of when the cash is received or paid.

The Department-wide Financial Statements include all activities of the DOE in one category: Governmental Activities. These activities include School Leadership, Instruction & Special Education Support; School Support Services (i.e., system-wide); the School Support Organization (i.e., superintendent, school-selected internal and external instructional support, and Integrated Service Center operational support and CFN); Central Administration; and Non-Public Schools.

Fund Financial Statements

The Fund Financial Statements provide more detailed information about the DOE’s funds, focusing on its most significant or “major” funds—not the DOE as a whole. Funds are accounting devices used to keep track of specific sources of funding and spending on particular programs.

The DOE has two kinds of funds:

- **Governmental funds:** are those by which most functions of the DOE are financed. The acquisition, use and balance of the expendable available financial resources and the related liabilities are accounted for through governmental funds. Consequently, the governmental funds statements provide a detailed short-term view that helps to determine whether there are more or fewer financial resources that can be spent in the near future to finance the DOE’s programs. Because this information does not encompass the additional long-term focus of the Department-wide statements, additional information behind the governmental funds statements explains the relationship (or differences) between them.

Department of Education of The City of New York Management's Discussion and Analysis

Since the DOE maintains a dependent relationship with The City, funding provided by The City and transfers from The City are used to supplement revenues received from federal, state and private sources to finance expenditures incurred through the end of the fiscal year. A final modified budget at year-end utilized The City funding to close most of the gap between the revenue and expenditures.

- **Fiduciary funds:** The DOE is the fiduciary for assets that belong to others, such as the student activities fund. The DOE is responsible for ensuring that the assets are used only for their intended purposes. The DOE excludes these activities from the Department-wide financial statements.

Financial Analysis of the Department-wide Financial Statements

At the close of Fiscal Year 2009, total liabilities of the DOE exceeded total assets by \$5.7 billion, a change in net assets of \$1.1 billion from that at the close of Fiscal Year 2008. Net deficits, as of June 30, 2009 and June 30, 2008, are summarized below for all governmental activities.

Figure 1

	Governmental Activities (000's Omitted)	
	<u>FY2009</u>	<u>FY2008</u>
Current and Other Assets.....	\$ 2,894,284	\$ 2,861,383
Capital Assets	17,923,698	15,784,420
Total Assets	<u>\$ 20,817,982</u>	<u>\$ 18,645,803</u>
Long-Term Liabilities.....	\$ 23,387,219	\$ 22,525,081
Other Liabilities.....	3,159,448	2,967,664
Total Liabilities.....	<u>26,546,667</u>	<u>25,492,745</u>
 Net Assets:		
Investment in Capital Assets, net of Related Debt	17,923,698	15,784,420
Unrestricted Deficit	<u>(23,652,383)</u>	<u>(22,631,362)</u>
Total Net Assets (Deficit)	<u>\$ (5,728,685)</u>	<u>\$ (6,846,942)</u>

Assets increased almost \$2.2 billion from \$18.6 billion as of June 30, 2008 to \$20.8 billion as of June 30, 2009 primarily due to the increase of the net value of capital assets (\$2.1 billion). Capital assets were increased due to buildings transferred from the School Construction Authority (SCA) for the DOE use (\$1.7 billion) and net increases in Construction in Progress (\$1.2 billion), offset by increases in net depreciation expense (\$71.1 million). The amounts due from The City decreased by \$37 million. This account is affected primarily by increases in accounts payable and accounts receivables because of the DOE's dependent fiscal relationship with The City.

Liabilities increased about \$1 billion from \$25.5 billion as of June 30, 2008 to \$26.5 billion as of June 30, 2009, primarily due to increases in the estimate of Other Postemployment Benefits (OPEB) liabilities of \$729 million. Additionally, there were increases in the accounts payable and accrued expenditures (\$21 million), Deferred Revenue (\$13 million), and the liabilities for Accrued Vacation and Sick Leave (\$124 million), Capital Lease Obligations (\$13 million), and Accrued Judgments and Claims (\$29 million).

In total, accounts receivable increased by \$67 million due to increases in state (about \$116 million) and non-government receivables (about \$28 million) and a decrease in federal receivables (\$77 million). There were also increases in Cash (\$5 million) and Inventories decreased by (\$1.4 million).

**Department of Education of The City of New York
Management's Discussion and Analysis**

The unrestricted deficit results primarily from long-term liabilities for which there are no corresponding capital assets, such as, pollution remediation, accrued vacation and sick leave, accrued judgments and claims and the unfunded retirement health and related benefits.

The DOE's net deficit decreased by \$1.1 billion from July 1, 2008 to June 30, 2009. The key elements of this change are as follows:

Figure 2

	Governmental Activities (000's Omitted)	
	<u>FY 2009</u>	<u>FY 2008</u>
<u>Revenues</u>		
<u>Program Revenues:</u>		
Charges for Services	\$ 65,381	\$ 74,412
Operating Grants and Contributions	10,610,110	9,938,824
<u>General Revenues:</u>		
City Funded	7,213,437	6,952,590
Other	14,134	16,252
Total Revenues	<u>17,903,062</u>	<u>16,982,078</u>
<u>Expenses</u>		
School Leadership, Instruction and Special Education Support	14,124,538	14,534,690
School Support Services	3,043,183	2,887,722
School Support Organization	352,850	375,524
Central Administration	450,258	496,918
Non-Public Schools	1,565,041	1,333,966
Total Expenses	<u>19,535,870</u>	<u>19,628,820</u>
Net Revenue (Expenses)	(1,632,808)	(2,646,742)
Change in Capital Assets and Inventory	<u>2,896,817</u>	<u>2,376,846</u>
Change in Net Assets	1,264,009	(269,896)
Net Assets (Deficit)—Beginning	(6,846,942)	(6,577,046)
Restatement of Beginning Balance	(145,752)	-
Net Assets (Deficit)—Ending	<u>\$ (5,728,685)</u>	<u>\$ (6,846,942)</u>

Federal program revenues decreased 3.2 percent from \$1.79 billion in Fiscal Year 2008 to \$1.73 billion in Fiscal Year 2009. However, State program revenues increased 7.3 percent from \$8.1 billion to \$8.7 billion.

Effective July 1, 2008 The City required that pollution remediation costs be accounted for in order to comply with Government Accounting Standard Board (GASB Statement No.49). The adaption of this standard resulted in the restatement of the beginning Net Asset balance in the amount of \$146 million and liability increase by \$4.8 million.

Expenditures include liabilities incurred by The City on behalf of the DOE which are not recorded on the modified accrual basis, but are included in full accrual accounting. Figure 2 expenses include changes in amounts due for: (1) vacation and sick leave; (2) capital leases; (3) judgments and claims; (4) depreciation expense; (5) the liability associated with Other Post employment Benefits; and (6) change in Pollution Remediation Obligations.

**Department of Education of The City of New York
Management's Discussion and Analysis**

In Fiscal Year 2008, the full accrual expenses include \$17 billion of modified accrual expenses and over \$2.7 billion of additional expenses incurred by The City, to report a full accrual expense of \$19.6 billion. In Fiscal Year 2009, the full accrual expenses include \$17.9 billion of modified accrual expenses and over \$1.6 billion of additional expenses incurred by The City to report a full accrual expense of \$19.5 billion, a decrease of 0.5 percent, or \$93 million from Fiscal Year 2008.

In Fiscal Year 2009, the category of School Leadership, Instruction and Special Education Support decreased about 3 percent from \$14.5 billion in Fiscal Year 2008 to \$14.1 billion in Fiscal Year 2009; this decrease is due to negotiated union contracts, contractual services, supplies and equipment. School Support Services increased 5.4 percent or \$155 million in Fiscal Year 2009 due to costs of the allocation of OPEB expenses \$51 million, energy and consumer price index increases to the school bus contracts. Central Administration decreased by 9.4 percent, or \$47 million, primarily due to contractual services and fixed charges. Non-Public Schools had increases of \$231 million resulting from increases in charter school expenditures, tuition for pre-K and school age special education, and in Pre-K transportation.

The increase in net assets in each fiscal year was primarily the result of the transfer of completed capital assets from the SCA to the DOE of \$1.4 billion in Fiscal Year 2008 and almost \$1.7 billion in Fiscal Year 2009.

Financial Analysis of the Governmental Funds

Total assets and liabilities increased \$34 million (1.2 percent) for the year ended June 30, 2009 compared to the prior year, as follows:

Figure 3

Condensed Balance Sheet (in millions of dollars)

	Governmental Activities		Amount	Percentage
	<u>June 30, 2009</u>	<u>June 30, 2008</u>	<u>Change</u>	<u>Change</u>
				<u>2008-2009</u>
Assets				
General Fund	\$ 2,885	\$ 2,846	\$ 39	1.4%
Capital Projects Fund.....	-	5	(5)	(100)%
Total Assets	<u>\$ 2,885</u>	<u>\$ 2,851</u>	<u>\$ 34</u>	1.2%
Liabilities				
General Fund	\$ 2,885	\$ 2,846	\$ 39	1.4 %
Capital Projects Fund.....	-	5	(5)	(100)%
Total Liabilities	<u>\$ 2,885</u>	<u>\$ 2,851</u>	<u>\$ 34</u>	1.2%

Changes in total governmental fund assets resulted mainly from two offsetting factors:

Changes in Total Assets: First, there was a net increase of \$37 million of amounts due from The City to pay for outstanding liabilities in the General Fund. At year end there were increases in the balances of Cash (\$5 million); a decrease in the accounts receivable from federal sources (\$77 million); and increases in state (\$116 million); and non-governmental sources (\$28 million).

Changes in Total Liabilities: Governmental fund liabilities increased \$34 million because of increases of almost \$21 million in accounts payable in the General Fund (\$26 million) and the decrease in the Capital Projects Fund (\$5 million). Also, there was an increase of \$13 million in the balance of the deferred revenue in the General Fund.

**Department of Education of The City of New York
Management's Discussion and Analysis**

Total revenues and expenditures increased \$926 million (5.5 percent) for the year ended June 30, 2009 compared to the prior year, as follows:

Figure 4

Changes in Revenues and Expenditures (in millions of dollars)

	<u>General Funds</u>		<u>Percentage Change 2008-2009</u>
	<u>FY2009</u>	<u>FY2008</u>	
<u>Revenues</u>			
Federal Aid	\$ 1,729.7	\$ 1,787.3	(3.2%)
State Aid	8,654.4	8,066.8	7.3%
Funding by The City	7,227.6	6,963.8	3.8%
Other	<u>291.4</u>	<u>159.1</u>	83.2%
Total Revenues	\$ <u>17,903.1</u>	\$ <u>16,977.0</u>	5.5%
<u>Expenditures</u>			
School Leadership, Instruction & Special Education Support	\$ 12,753.6	\$ 12,240.2	4.2%
School Support Services	2,851.5	2,646.1	7.8%
School Support Organization	318.2	316.3	1.0%
Central Administration	414.7	440.4	(5.8)%
Non-Public Schools	<u>1,565.1</u>	<u>1,334.0</u>	17.3%
Total Expenditures	\$ <u>17,903.1</u>	\$ <u>16,977.0</u>	5.5%

Although the DOE does not maintain a fund balance at the end of each fiscal year, strong financial performance is exhibited in its ability to secure additional revenues from State and City sources to provide additional personnel, programs or facilities to the school system. Although overall Federal program revenues decreased 3.2 percent from \$1.79 billion in Fiscal Year 2008 to \$1.73 billion in Fiscal Year 2009, State program revenues increased 7.3 percent from \$8.1 billion to \$8.7 billion, and City revenues increased 3.8 percent from \$6.96 billion to \$7.23 billion.

Major programs that benefited from increased individual revenues included: Federal Aid increases of \$1.2 million for Universal Pre-K; \$14 million for Occupational Education Aid (offset by Federal Aid decreases of \$6.3 million for Title I Disadvantaged Children; \$18 million for Reading First; and \$13 million for Title II Math & Science); and State Aid increases of \$549 million for Foundation Aid; \$8.3 million for Transportation Aid; and \$22 million for Private Excess Cost Aid.

Total expenditures, under modified accrual accounting, increased 5.5 percent or \$926 million. Expenditures in the area of School Leadership, Instruction and Special Education Support increased \$513 million (4.2 percent) mainly for personal services costs (salaries) for teachers in the classroom, and the respective fringe costs for these salaries. School Support Services increased \$205 million (7.8 percent) mainly for: Pupil Transportation, whose school bus contracts contain an annual adjustment based on consumer price index; increases in the escort costs; and growth in the number of routes. Expenditures in the area of School Support Organization increased about \$1.9 million (1 percent) as a result from Children First Reform agenda. Central Administration decreased overall by \$25.7 million (5.8 percent). Non-Public Schools expenditures increased \$231 million (17.3 percent), mainly from increases in charter school expenditures, tuition for Pre-K and school age special education, and in Pre-K transportation.

Department of Education of The City of New York Management's Discussion and Analysis

General Fund Budgetary Highlights

Over the course of the year, the DOE revised its annual operating budget several times. These budget modifications fall into six categories:

- Intra-city adjustments of \$1.9 million to reimbursable program budgets;
- Executive and Adopted Budget Actions which increased Tax Levy budgets by \$60.7 million and reimbursable program budgets by \$9.8 million. In addition, the schools rolled Tax Levy surpluses of \$95 million from fiscal year 2009 to fiscal year 2010, of which \$55 million was reflected in the fiscal year 2009 Executive Budget and \$40 million was reflected prior to the fiscal year 2009 Adopted Budget;
- November and January Plan Actions, which decreased Tax-Levy Budgets by a net (\$155.2) million and increased Reimbursable Program Budgets by \$6.3 million; Included in the November Plan is the City's reduction program which reduced Tax-Levy budgets by (\$180.5) million;
- School Food programs were increased by \$6 million to Tax-Levy budgets and by \$1 million to Reimbursable program budgets;
- Final Fiscal Year Close Actions, which increased Tax-Levy budgets by \$76.9 million and decreased Reimbursable Program Budgets by (\$15.7) million;
- Additional Fiscal Year Close Actions, which include an increase to Tax Levy budgets of \$158.5 million, are attributable to the effects of GASB Statement No. 49, Pollution Remediation requirements.

As a result of the above, the DOE made net modifications to the adopted budget of over \$148.3 million.

**Department of Education of The City of New York
Management's Discussion and Analysis**

Capital Assets

The DOE's investment in capital assets includes land, buildings, equipment and construction in progress, which are detailed as follows (net of accumulated depreciation):

Figure 5

**Governmental Activities
(000's Omitted)**

	<u>FY2009</u>	<u>FY2008</u>
Land.....	\$ 446,997	\$ 446,997
Buildings.....	13,376,275	12,390,052
Equipment.....	76,294	84,453
Construction in Progress.....	<u>4,024,132</u>	<u>2,862,918</u>
Total	<u>\$ 17,923,698</u>	<u>\$ 15,784,420</u>

In Fiscal Year 2009, capital assets, net of accumulated depreciation, increased from the previous fiscal year by \$2.1 billion, primarily due to capital assets (completed new construction and equipment) that were transferred to the DOE from the SCA in the amount of \$1.7 billion. In Fiscal Year 2008, capital assets, net of accumulated depreciation, increased from the previous fiscal year by \$1.7 billion, primarily due to capital assets that were transferred to the DOE from the SCA in the amount of \$1.4 billion.

Factors Bearing on the Department's Future

At the time these financial statements were prepared and audited, the DOE was not aware of any existing circumstance that would significantly impact its financial health in the future.

Contacting the Department's Financial Management

These financial statements are designed to provide The City's citizens, taxpayers, customers, investors and creditors with a general overview of the DOE's finances and to demonstrate the DOE's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Executive Director of the Division of Financial Operations, 65 Court Street, Room 1802, Brooklyn, New York 11201.

FUND BALANCE	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>

Note: The reconciliation of the fund balance of the governmental funds to the change in net assets of the governmental activities of the Statement of Activities is presented in an accompanying schedule.

See accompanying notes to the financial statements.

Department of Education of The City of New York
Reconciliation of the Statement of Revenues, Expenditures and Changes
in Fund Balance to the Statement of Activities
For the Year Ended June 30, 2009
(\$000 Omitted)

Amounts reported for governmental activities in the Statement of Activities are different because:

Total Fund Balance - Governmental Funds	\$	-
Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of these assets is allocated over their estimated useful lives.		9
Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense.		(758,978)
Some expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds:		
Change in Other Postemployment Benefit Obligations	\$ (729,332)	
Change in Sick Leave and Vacation Liability	(123,499)	
Change in Pollution Remediation Obligations	(4,794)	
Change in Capital Lease Obligations	12,771	
Change in Judgments and Claims Liability	<u>(28,985)</u>	(873,839)
Net changes in capital assets and inventory where neither revenues nor expenses are incurred by the Department, net of Department costs.		<u>2,896,817</u>
Change in Net Assets - governmental activities	\$	<u><u>1,264,009</u></u>

See accompanying notes to the financial statements.

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

On June 12, 2002 Governor George Pataki signed school governance legislation that removed accountability for the oversight of The City's public schools from an appointed seven member Board of Education to the Mayor. As a result of governance law, the Board of Education is now known as the Department of Education of the City of New York (DOE), with a Chancellor who is appointed by the Mayor and who is accountable to him. Although there has been a change in the title of our public school system and its reporting relationship, the legal entity remains as the Board of Education of the City of New York.

The DOE is organized and administered in accordance with the provisions of the State of New York Education Law and consists of five Integrated Service Centers (ISCs) and four Children First Network CFN/School Support Organizations, Empowerment Support Organization (ESO), Learning Support Organization (LSO), Integrated Service Center (ISC), Partnership Support Organization (PSO) across The City of New York (The City) and SSOs. Each geographic ISC includes approximately three hundred and five schools. Each ISC contains up to six community school districts, as well as, the high schools located within their geographic boundaries. The SSOs are comprised of four (4) LSOs; two ESO/ESA and PSO. The schools are self-affiliated to one of the SSOs. The ESOs were conceived in 2004 and have a network of 515 schools in the current school year. The PSOs led by non-profit groups with strong records of community services as well as LSOs. LSOs are led and operated by four accomplished educators who develop theme based comprehensive services packages for the schools. The ISC Management Team is led by an Executive Director in each ISC.

The primary goal of the ISC/CFNs is to provide support services to the schools in the areas of business, operations and special education. In partnership with SSOs, school communities are able to focus more energy on providing the highest quality educational services to The City school students. ISC professional staff members work directly with principals to ensure that the services provided are effectively delivered to schools.

The DOE continues to be fiscally dependent on The City and, accordingly, is included in The City's financial statements. As such, the DOE does not have the authority to levy taxes or issue debt and is dependent upon The City for a substantial portion of its appropriations (i.e. spending authority). In addition, The City budget incurs certain costs on behalf of the DOE that are not allocated to the DOE and, accordingly, are not reflected in the accompanying financial statements. Such costs include current payments for debt service and pension costs for tax levy funded employees. Thus, the revenues and expenditures, and related budget data included in the accompanying financial statements are not indicative of the level of appropriations, as if the DOE were an independent school system.

New Accounting Standards Adopted

In fiscal year 2009, the DOE adopted four new statements and one technical bulletin of financial accounting standards issued by the Governmental Accounting Standards Board (GASB):

- Statement No. 49 *Accounting and Financial Reporting for Pollution Remediation Obligations*
- Statement No. 52 *Land and Other Real Estate Held as Investments by Endowments*
- Statement No. 55 *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*
- Statement No. 56 *Codification of Accounting and Financial Reporting Guidance Contained in the AICPA Statements on Auditing Standards*
- Technical Bulletin No. 2008-1 *Determining the Annual Required Contribution Adjustment for Postemployment Benefits*

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

Statement No. 49 establishes accounting and financial reporting standards for pollution remediation obligations which are obligations to address the current or potential detrimental effects of existing pollution (e.g., hazardous wastes spills and asbestos contamination) by participating in pollution remediation activities such as site assessments and cleanups. Pollution remediation obligations exclude pollution prevention or control obligations relating to current operations and future pollution remediation activities such as landfill closure and postclosure care. GASB Statement No. 49 identifies the obligating events which require a governmental entity to estimate the components of expected pollution remediation outlays and determine whether outlays for those components should be accrued as a liability or, if appropriate, capitalized when goods and services are acquired. The Statement amends: NCGA Statement 1, *Governmental Accounting and Financial Reporting Principles*, NCGA Statement 4, *Accounting and Financial Reporting Principles for Claims and Judgments and Compensated Absences*, NCGA Interpretation 6, *Notes to the Financial Statements Disclosure*, GASB Statement No. 10, *Accounting and Financial Reporting for Risk Financing and Related Insurance Issues*, and GASB Interpretation No. 6, *Recognition and Measurement of Certain Liabilities and Expenditures in Governmental Fund Financial Statements*, to provide specific reporting guidance for pollution remediation obligations, including disclosure requirements. Comparability of financial statements among governments will be enhanced by GASB Statement No. 49 requiring all governments to account for pollution remediation obligations in the same manner, including required reporting of pollution remediation obligations that previously may not have been reported. The Statement also will enhance users' ability to assess governments' obligations by requiring more timely and complete reporting of obligations as their components become reasonably estimable.

The financial reporting impact resulting from the implementation of GASB Statement No. 49 is the restatement of net assets in the department-wide financial statements by \$146 million for pollution remediation obligations measured at the beginning of fiscal year 2009. For periods prior to the implementation of GASB Statement No. 49, the DOE does not have sufficient objective and verifiable information to apply the expected cash flow technique to measurements of pollution remediation obligations.

As described in Note 3E of the financial statements, SCA was created for the purpose of designing, constructing, reconstructing, improving, rehabilitating and repairing the New York City public schools. SCA has reported, and identified Pollution remediation costs as asbestos abatement, lead paint abatement, and soil contamination remediation project work performed at New York City Public Schools. Such costs were associated with capital assets of the DOE and, accordingly are recorded in the DOE financial statements.

The Pollution Remediation Obligations (PRO) at June 30, 2009 summarized by obligating event and pollution type, respectively, are as follows:

<u>Obligating Event</u>	<u>Amount</u> <u>(000's)</u>	<u>Percentage</u>
Imminent endangerment	\$ 45,164	30.0%
Violation of pollution prevention-related permit or license.....	5,018	3.3%
Named by regulator as a potentially responsible party	1,004	0.7%
Voluntary commencement	<u>99,360</u>	<u>66.0%</u>
Total	<u>\$ 150,546</u>	<u>100.0%</u>

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

<u>Pollution Type</u>	<u>Amount</u> (000's)	<u>Percentage</u>
Asbestos removal	\$ 128,466	85.3%
Lead paint removal	7,025	4.7%
Soil remediation	<u>15,055</u>	<u>10.0%</u>
Total	<u>\$ 150,546</u>	<u>100.0%</u>

There are no expected recoveries deemed not yet realized or realizable to reduce the liability. The PRO liability is derived from registered multi-year contracts which offset cumulative expenditures (liquidated/unliquidated) against original encumbered contractual amounts. The potential for changes to existing PRO estimates is recognized due to such factors as: additional remediation work arising during the remediation of an existing pollution project; remediation activities may find unanticipated site conditions resulting in necessary modifications to work plans; changes in methodology during the course of a project may cause cost estimates to change, e.g., the new ambient air quality standard for lead considered a drastic change will trigger the adoption of new/revised technologies for compliance purposes; and changes in the quantity which is paid based on actual field measured quantity for unit price items measured in cubic meters, linear meters, etc. Consequently, changes to original estimates are processed as change orders. Further, regarding pollution remediation liabilities, or portions thereof, that are not yet recognized because they are not reasonably estimable, responders for 99% of the PRO estimate relate that there are no such liabilities. All pollution remediation conditions as determined are estimable. The remaining 1% relates to projects which include testing activities but other remediation-related activities (e.g., design of remediation plans, remediation, and monitoring) may not be included in initial estimates.

Statement No. 52 requires endowments to report their land and other real estate investments at fair value. Governments also are required to report the changes in fair value as investment income. GASB Statement No. 52 amends the scope of Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*, to apply the disclosure provisions of paragraph 15 of that Statement to land and other real estate held as investments by endowments. Accordingly, endowments should disclose “the methods and significant assumptions used to estimate the fair value of investments, if that fair value is based on other than quoted market prices.” The objective of this Statement is to enhance the comparability and usefulness of financial reporting by endowments by establishing a common approach to reporting land and other real estate held as investments with other entities that exist for similar purposes.

There was no impact on the DOE’s financial statements as a result of the implementation of GASB Statement No. 52 since the DOE’s governmental funds category does not include a Permanent Funds fund type.

Statement No. 55 provides for the codification of all GAAP for state and local governments so that they derive from a single source and consequently, the current GAAP hierarchy as set forth in the American Institute of Certified Public Accountants’ literature will then reside in the accounting literature established by GASB. The objective of this Statement is to identify the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of state and local governmental entities that are presented in conformity with GAAP.

There was no impact on the DOE’s financial statements as a result of the implementation of GASB Statement No. 55.

Statement No. 56 provides for the codification of certain accounting and financial reporting guidance presented in the American Institute of Certified Public Accountants’ Statements on Auditing Standards into the authoritative literature of GASB. This Statement does not establish new accounting standards but rather incorporates the existing guidance (to the extent appropriate in a governmental environment) into the GASB standards by addressing three issues that establishes accounting principles-related party transactions, going concern considerations, and subsequent events.

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

There was no impact on the DOE's financial statements as a result of the implementation of GASB Statement No. 56.

Technical Bulletin No. 2008-1 clarifies the requirements of GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers* and GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions* for calculating the Annual Required Contribution (ARC) adjustment. The objective of the ARC adjustment procedure in GASB Statements 27 and 45 is to offset the amount that has been included in the ARC for the amortization of past contribution deficiencies or excess contributions of the employer. Use of the ARC adjustment is intended to avoid misstatement of annual pension or OPEB cost and to maintain consistency between actuarial and accounting measurements on an ongoing basis. When the actual amount of interest (and principal, if any) is known, the known amount rather than an amount derived from the application of estimation procedures established in GASB Statements 27 and 45 is used for purposes of determining annual pension or OPEB cost, respectively.

There was no impact on the DOE's Financial Statements as a result of the implementation of Technical Bulletin No. 2008-01.

Pronouncements Issued But Not Yet Effective

In June, 2007, GASB issued Statement No. 51, *Accounting and Financial Reporting for Intangible Assets*. The Statement requires that all intangible assets not specifically excluded by its scope provisions be classified as capital assets. Accordingly, existing authoritative guidance related to the accounting and financial reporting for capital assets should be applied to these intangible assets, as applicable. GASB Statement No. 51 also provides authoritative guidance that specifically addresses the nature of these intangible assets. Such guidance should be applied in addition to the existing authoritative guidance for capital assets. The objective of GASB Statement No. 51 is to establish accounting and financial reporting requirements for intangible assets to reduce inconsistencies relating to recognition, initial measurement, and amortization, thereby enhancing the comparability of the accounting and financial reporting of such assets among state and local governments. The Statement requires that an intangible asset be recognized in the Statement of Net Assets only if it is considered identifiable. Additionally, the Statement establishes a specified-conditions approach to recognizing intangible assets that are internally generated. Effectively, outlays associated with the development of such assets should not begin to be capitalized until certain criteria are met. Outlays incurred prior to meeting these criteria should be expensed as incurred. GASB Statement No. 51 also provides guidance on recognizing internally generated computer software as an intangible asset. This guidance serves as an application of the specified-conditions approach described above to the development cycle of computer software. The Statement also establishes guidance specific to intangible assets related to amortization. Guidance is provided on determining the useful life of intangible assets when the length of their life is limited by contractual or legal provisions. If there are no factors that limit the useful life of an intangible asset, the Statement provides that the intangible asset be considered to have an indefinite useful life. Intangible assets with indefinite useful lives should not be amortized unless their useful life is subsequently determined to no longer be indefinite due to a change in circumstances.

The requirements of GASB Statement No. 51 are effective for financial statements for periods beginning after June 15, 2009. The provisions of this Statement generally are required to be applied retroactively. For the DOE, retroactive reporting is required for intangible assets acquired in fiscal years ending after June 30, 1980, except for those considered to have indefinite useful lives as of the effective date of the Statement and those that would be considered internally generated. While earlier application of the Statement is encouraged, the DOE has not completed the process of evaluating the impact of GASB Statement No. 51 on its financial statements.

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

In June, 2008, GASB issued Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments*. The objective of the Statement is to enhance the usefulness and comparability of derivative instrument information reported by state and local governments by providing a comprehensive framework for the recognition, measurement, and disclosure of derivative instrument transactions. Derivative instruments such as interest rate and commodity swaps, interest rate locks, options (caps, floors, and collars), swap options, forward contracts, and futures contracts are entered into by governments as investments; as hedges of identified financial risks associated with assets or liabilities, or expected transactions (i.e., hedgeable items); to lower the costs of borrowings; to effectively fix cash flows or synthetically fix prices; or to offset the changes in fair value of hedgeable items. A key provision of GASB Statement No. 53 is that certain derivative instruments, with the exception of synthetic guaranteed investment contracts that are fully benefit-responsive are reported at fair value by governments in their government-wide financial statements. This provision should allow users of those financial statements to more fully understand a government's resources available to provide services. The application of interperiod equity means that changes in fair value are recognized in the reporting period to which they relate. The changes in fair value of hedging derivative instruments do not affect investment revenue but are reported as deferrals. Alternatively, the changes in fair value of investment derivative instruments (which include ineffective hedging derivative instruments) are reported as part of investment revenue in the current reporting period. Effectiveness is determined by considering whether the changes in cash flows or fair values of the potential hedging derivative instrument substantially offset the changes in cash flows or fair values of the hedgeable item. The Statement describes several quantitative methods and a qualitative method for evaluating effectiveness. The disclosures required by Technical Bulletin No. 2003-1, *Disclosure Requirements for Derivatives Not Reported at Fair Value on the Statement of Net Assets*, have been incorporated into GASB Statement No. 53. The disclosures provide a summary of the government's derivative instrument activity and the information necessary to assess the government's objectives for derivative instruments, their significant terms, and the risks associated with the derivative instruments.

The requirements of GASB Statement No. 53 are effective for financial statements for periods beginning after June 15, 2009, while earlier application of the Statement is encouraged. The DOE has not completed the task of evaluating the impact of GASB Statement No. 53 on its financial statements.

In February, 2009, GASB issued Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. The Statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds. Governments are required to classify and report amounts in the appropriate fund balance classifications by applying their accounting policies that determine whether restricted, committed, assigned, and unassigned amounts are considered to have been spent. Disclosure of the policies in the notes to the financial statements is required. Governments are also required to disclose information about the processes through which constraints are imposed on amounts in the committed and assigned classifications. GASB Statement No. 54 also provides guidance for classifying stabilization amounts on the face of the balance sheet and requires disclosure of certain information about stabilization arrangements in the notes to the financial statements. The objective of this Statement is to enhance the usefulness of fund balance information by providing clearer fund balance classifications that can be more consistently applied and by clarifying the existing governmental fund type definitions.

The requirements of GASB Statement No. 54 are effective for financial statements for periods beginning after June 15, 2010. Fund balance reclassification made to conform to the provision of this statement should be applied retroactively by restating fund balance for all prior periods presented. While an earlier application of the statement is encouraged, the DOE has not completed the process of evaluating the impact of GASB Statement No. 54 on its financial statements.

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

B. Basis of Presentation

Department-wide Financial Statements — The Department-wide Financial Statements consist of the Statement of Net Assets and the Statement of Activities. The Statement of Net Assets presents the difference between the DOE's total assets and total liabilities. The Statement of Activities presents a comparison between direct expenses and program revenues for each function of the DOE's activities. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include: (i) charges for services such as revenues from providing school lunches and rental revenues; and (ii) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or program. Other revenues not recorded as program revenues are reported as general revenue.

Upon substantial completion of capital assets, the School Construction Authority (SCA) transfers such assets to the DOE. In Fiscal Years 2009 and 2008, the SCA transferred \$1.7 billion and \$1.4 billion, respectively, in completed assets to the DOE.

Description of Functions in the Statement of Activities —The Statement of Activities summarizes program expenses by major functions, as follows:

- **School Leadership, Instruction and Special Education Support** — which includes district, high school, special education instructional support and special education services expenditures, such as, salary costs of teachers, principals, paraprofessionals and other costs directly and indirectly associated with the classroom.
- **School Support Services** — which includes the costs of school facilities, pupil transportation, food, school safety, energy and leases.
- **School Support Organization** — which includes operations of ISC/CFN offices.
- **Central Administration** — which includes central office support services for system-wide maintenance, and for development of agency-wide budgeting, purchasing, accounting and student demographic information applications.
- **Non-Public Schools** — which represents the amount of funding passing through the DOE to independent non-public schools.
- **Fund Financial Statements** — The fund financial statements provide information about the DOE's funds, including fiduciary funds. Separate financial statements are provided for governmental and fiduciary funds. Major individual governmental funds are reported as separate columns in the fund financial statements. The DOE has no governmental funds that are considered non-major. The accounts of the DOE are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, and revenues and expenditures where applicable. Government resources are allotted to, and accounted for, in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled. The DOE's funds are grouped in the financial statements in two fund categories, as follows:

Governmental Funds — Governmental funds are those by which most functions of the DOE are financed. The acquisition, use and balance of the expendable available financial resources and the related liabilities are accounted for through governmental funds. The following are the DOE's governmental funds, both of which are considered major funds:

- **General Fund** — The General Fund is the general operating fund of the DOE. It is used to account for all financial resources except those required to be accounted for in another fund.

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

- **Capital Projects Fund** — The Capital Projects Fund is used to account for financial resources used for school improvements and other facility related expenditures. These amounts do not reflect capital expenditures and commitments by the SCA on behalf of the DOE. The SCA commitment and expenditure activity is included in The City's basic financial statements.

Fiduciary Funds — Fiduciary Funds are used to account for assets held by the DOE in a custodial capacity. These funds are used to account for assets held by the DOE as an agent for student activities, individuals and private organizations. The DOE does not have any fiduciary funds, other than agency funds.

C. Basis of Accounting

The basis of accounting determines when transactions are reported on the financial statements. The Department-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Non-exchange transactions, in which the DOE either gives or receives value without directly receiving or giving equal value in exchange, include, for example, grants, entitlements, and donations. On an accrual basis, revenue from grants, entitlements, and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Governmental fund financial statements use the flow of current financial resources measurement focus. This focus is on the determination of, and changes in financial position. These funds use the modified accrual basis of accounting, whereby revenues are recognized in the accounting period in which they become both measurable and available to finance expenditures of the fiscal period. Revenues from categorical and other grants are generally considered available if received within one year after the fiscal year end, except those indicated in Note 1.D. - Accounts Receivable. Expenditures are recorded when the related liability is incurred and payment is due.

The fiduciary funds use the modified accrual basis of accounting and do not measure the results of operations.

Reconciliation of Department-wide and Fund Financial Statements — A summary reconciliation of the difference between the total fund balances as reflected on the DOE Fund Balance Sheet and total net assets for the DOE activities as shown on the Department-wide Statement of Net Assets is presented in an accompanying statement to the DOE Fund Balance Sheet.

A summary reconciliation of the difference between net changes in fund balances as reflected on the Fund Statement of Revenues, Expenditures, and Changes in Fund Balances and changes in net assets for activities as shown on the Department-wide Statement of Activities is presented in an accompanying statement, as well.

D. Assets, Liabilities, and Net Assets

Program Revenue — Program revenue is derived from federal, state, and private aid sources, as well as charges for services and funding from The City.

Accounts Receivable — Accounts Receivable includes certain aged receivables from the State which extend beyond the normal period of collection used to determine availability for revenue recognition purposes. However, since payments are being made by the State and federal sources, such receivables have not been deemed uncollectible.

Accounts Payable — Accounts Payable includes all payments of bills and payrolls since June 30, 2009 and accruals for payments to be made in the future, which applies to liabilities incurred as of June 30, 2009. Further, included in accounts payable are all payments that were processed through the DOE's accounting system, but not yet cleared The City's accounting system. In addition, included are all prior year accruals which have not been liquidated through The City's accounting system.

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

School Supplies and Textbooks — Expenditures for school supplies and textbooks are charged as expenses to the individual community school districts and schools when school supplies and textbooks are received.

Donated Commodities — The DOE participates in various federal and state aided food programs. Many of these programs provide for commodities to be supplied to the DOE in lieu of, or in addition to, cash. The value of these donated commodities received and used during the year was approximately \$23.2 million.

The value of these donated commodities received and still on hand, as of June 30, 2009 and 2008 was \$0.9 million and \$0.5 respectively.

Materials and Supplies — Inventories on hand at June 30, 2009 amounted to approximately \$7.9 million based on the moving average cost method. Inventories are recorded as expenditures in governmental funds at the time of purchase and, accordingly, have not been reported on the governmental funds balance sheet. As of June 30, 2008 this value was \$9.7 million.

Encumbrances — Encumbrance accounting, under which purchase orders, contracts, and other commitments for expenditures are recorded to reflect the use of the applicable spending appropriation, is used by the General Fund during the fiscal year to control expenditures. Cost of goods received and services rendered on or before June 30 are recognized as expenditures.

Deferred Revenue — Deferred revenue represents cash advances of \$79.6 million received by the DOE against which qualifying expenditures have not yet been incurred, as of June 30, 2009. As of June 30, 2008 cash advances amounted to \$66.7 million.

Salaries — Most instructional personnel are employed under annual employment contracts covering the period from September through the following August. Since all services required under the annual contracts generally are performed prior to June 30, salaries which are disbursed for the months of July and August are accrued at June 30. The value of these services paid in July and August 2009 was \$1.4 billion. As of June 30, 2008 the value of these services was \$1.38 billion.

Vacation and Sick Leave and Cumulative Annual Reserve — Earned vacation and sick leave and Cumulative Annual Reserve (CAR) are recorded as expenditures in the period when it is payable from current financial resources in the fund financial statements. The estimated value of vacation leave and CAR earned by employees, which may be used in subsequent years or earned as vacation and sick leave and CAR to be paid upon termination or retirement, and therefore, payable from future resources, is recorded as a liability in the Department-wide Financial Statements. Under the terms of various labor contracts, the DOE employees are granted vacation and sick leave and CAR in varying amounts.

Judgments and Claims — The City is uninsured with respect to most risks including, but not limited to, property damage, and personal injury, and workers' compensation. In the fund financial statements, expenditures for judgments and claims (other than workers' compensation) are recorded by The City on the basis of settlements reached, or judgments entered into, within the current fiscal year. Expenditures for workers' compensation are recorded when paid.

Pensions — The provision for pension costs for the DOE is recorded in The City's General Fund. That provision includes normal costs, interest on prior pension costs not funded, and amortization of past service costs as determined by the actuary employed by the Boards of Trustees of The City's major pension systems. (See Note 4.B.)

Changes in Estimates of Prior Year Payables and Receivables — Changes in estimated prior year payables and receivables result in changes in transfers from and to The City. These changes, including the net transfer from and to The City, have no net effect on the excess of revenues over expenditures.

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

Estimates and Assumptions — A number of estimates and assumptions relating to the reporting of revenues, expenditures, assets and liabilities and the disclosure of contingent liabilities were used to prepare these financial statements in conformity with accounting principles generally accepted in the United States of America. Significant estimates include accrued expenses and other liabilities, depreciable lives of buildings and equipment – assuming normal maintenance, amortization of leasehold improvements, accrued vacation and sick leave, accrued judgments and claims, OPEB obligations and Pollution Remediation Obligations. Actual results could differ from those estimates.

School Activity Funds — General school funds are established by individual schools to account for monies received from students and organizations for programs independent of the DOE. These monies are raised primarily through school or student extra-classroom activities to finance approved activities. Since the community school districts and the individual schools function solely as an agent in the collection and disbursement of these monies, the monies are reported as Fiduciary Funds in the accompanying statements. The cash in the agency fund includes the balances of 1,493 separate school activity funds. All but three of these bank accounts are maintained by the schools under the responsibility of the respective principals. Three bank accounts are maintained in the central office for the benefit of the schools.

Program Expenses — Program expenses denote the use of funds derived from federal and state aid sources, charges for services and funding from The City.

The total program expenses included in the Statement of Activities for the year ended June 30, 2009 (\$19.5 billion) differ from the total expenditures and other uses included in the Statement of Revenues, Expenditures and Changes in Fund Balances (\$18 billion) because of adjustments necessary to convert expenditures from the modified accrual basis of accounting to the full accrual basis (as outlined in the Management’s Discussion and Analysis section). The following schedule reconciles these two accounting basis:

Figure 1

	Amount <u>(\$000 Omitted)</u>
Total Expenditures and Other Uses (from the Statement of Revenues, Expenditures and Changes in Fund Balance).....	\$ 17,888,919
Add back Intra-City Sales (which are included in General Revenue in Statement of Activities).....	14,134
Depreciation Expense	758,978
Long-term liabilities per full accrual basis:	
Other Postemployment Benefit Obligations	729,332
Sick Leave and Vacation Balances	123,499
Pollution Remediation Obligations.....	4,794
Capital Leases.....	(12,771)
Judgments and Claims	<u>28,985</u>
Total Program Expenses (from the Statement of Activities)	<u>\$ 19,535,870</u>

The total program expenses included in the Statement of Activities for the year ended June 30, 2008 (\$19.6 billion) differs from the total expenditures and other uses included in the Statement of Revenues, Expenditures and Changes in Fund Balances (\$17 billion) because of adjustments necessary to convert expenditures from the modified accrual basis of accounting to the full accrual basis (as outlined in the Management’s Discussion and Analysis section). The following schedule reconciles these two accounting basis:

Capital Leases.....	28,963
Judgments and Claims	7,243
Total Program Expenses (from the Statement of Activities)	<u>\$ 19,628,820</u>

2. STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

A. Budgetary Data

The revenue and expenditure budget is based on GAAP with respect to those elements that are the DOE's responsibility, and such budget is to be balanced in accordance with mandatory requirements of The City Charter. Annual expenditure budget appropriations are adopted as described below for the General Fund. During the year, decreases or increases to the budget, including amounts rolled to the subsequent fiscal year, adjust the final modified budget. Unused budget amounts lapse at the fiscal year end. Appropriations are also made in a Capital Budget to authorize the expenditure of funds for various capital projects. Capital appropriations, unless modified or rescinded, remain in effect until the completion of each project.

The budget of the DOE is categorized into Units of Appropriation. Each Unit of Appropriation represents an area of instructional costs, a service program or a division within the DOE. The City Council through the Adopted Budget of The City appropriates funds to these Units of Appropriation.

Distinct Units of Appropriation are required for Personal Service expenditures and for Other Than Personal Service expenditures. Each Unit of Appropriation is delineated further by Budget Codes, which designate individual functions within a Unit of Appropriation (office, bureau or type of service). For Personal Service expenditures, Line Numbers further refine Budget Codes identifying specifically the titles funded. For Other Than Personal Service expenditures, Object Codes further refine Budget Codes identifying specifically the types of goods or services funded (supplies, equipment, contractual services, etc.).

The Division of Budget Operations and Review monitors expenditures throughout the fiscal year to insure that spending remains within the amount of funds authorized in each Unit of Appropriation. Budget modifications are processed as required to transfer funds from one Unit of Appropriation, Budget Code, Line Number or Object Code to another as needed. Budget modifications require City Council approval if cumulative modifications are greater than or equal to 5 percent of the adopted budget for the Unit of Appropriation. The appropriation for heat, light and power is based upon cost allocation formulas developed by other City agencies.

Department of Education of the City of New York
Notes to the Financial Statements

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

3. DETAILED NOTES ON ALL FUNDS

A. Cash

Bank balances are maintained with banks that are members of the Federal Deposit Insurance Corporation (FDIC). The FDIC insures bank balances up to a maximum of \$250,000 in the aggregate by the FDIC for each bank for all funds. As the DOE's general fund cash balance is part of The City's cash management system, which is considered one depositor for FDIC purposes, and as the Agency Funds include over 1,493 accounts maintained at the school level, the DOE cannot determine the amounts that are insured or collateralized. The City has reported that approximately 0.54 and 0.33 percent of The City's June 30, 2009 and June 30, 2008 General Fund bank balances, which includes the DOE's General Fund bank deposits, were uninsured and uncollateralized with securities held by The City's agent in The City's name.

B. Investments

In accordance with New York State Education Law, substantially all General Fund revenues are paid directly to and deposited with The City. Such amounts are commingled and invested with The City's funds and are not included in the accompanying balance sheets. The City's investment of cash in its Governmental Fund Types is currently limited to U.S. Government guaranteed securities and U.S. Government agency securities purchased directly and through repurchase agreements from primary dealers as well as commercial paper rated A1 and P1 by Standard & Poor's Corporation and Moody's Investors Service, Inc., respectively. The repurchase agreements must be collateralized by U.S. Government guaranteed securities, U. S. Government agency securities or eligible commercial paper in a range of 100% to 102% of the matured value of the repurchase agreements.

The DOE's regulations permit schools to deposit and invest student activity funds in banks authorized to do business in New York State, including making investments in time deposits and certificates of deposit.

C. Lease Commitments

The DOE leases various types of property and equipment. Total lease expenditures for the year ended June 30, 2009 and June 30, 2008 were approximately \$128 million and \$120 million, respectively. As of June 30, 2009, the DOE has future minimum rental obligations on leases with a remaining term in excess of one year as follows (\$000 omitted):

Figure 7

Year(s) Ending June 30,	Total Amount	Capital Leases	Operating Leases
2010	\$ 102,322	\$ 23,499	\$ 78,823
2011	92,317	22,154	70,163
2012	86,651	20,978	65,673
2013	85,495	21,263	64,232
2014	73,577	20,202	53,375
2015-2019	313,028	79,963	233,065
2020-2024	169,084	51,040	118,044
2025-2029	90,988	22,672	68,316
2030-2034	50,324	19,742	30,582
2035-2039	14,373	473	13,900
Total minimum lease payments	<u>\$ 1,078,159</u>	<u>281,986</u>	<u>\$ 796,173</u>
Less imputed interest		<u>(91,519)</u>	
Present value of net minimum lease payments		<u>\$ 190,467</u>	

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

D. Long-Term Liabilities

The long-term liabilities include capital leases entered into by the DOE as well as the DOE's portion of various other long-term liabilities, payment for which The City is responsible. Funding for these allocated liabilities will be provided through future appropriations of The City. Payments for certain amounts of these liabilities are due in fiscal years 2009 and 2008 and funds have been appropriated for such payments.

Changes in the various components of the long-term liabilities for fiscal year 2009 are as follows (\$000 omitted):

Figure 8

	<u>Balance</u> <u>July 1, 2008</u>	<u>Additions</u>	<u>Deletions</u>	<u>Balance</u> <u>June 30, 2009</u>	<u>Due Within</u> <u>One Year</u>
Accrued Vacation and Sick Leave..	\$ 1,670,491	\$ 166,546	\$ (43,047)	\$ 1,793,990	\$ 43,047

Accrued Judgments and Claims.....	288,321	88,369	(59,384)	317,306	82,640
Pollution Remediation	145,752	150,546	(145,752)	150,546	135,491
OPEB Obligations	20,479,527	1,123,700	(394,368)	21,208,859	-
TOTALS.....	\$ 22,787,329	\$ 1,529,161	\$ (655,322)	\$ 23,661,168	\$ 273,949

Changes in the various components of the long-term liabilities for fiscal year 2008 are as follows (\$000 omitted):

Figure 9

	<u>Balance</u> <u>July 1, 2007</u>	<u>Additions</u>	<u>Deletions</u>	<u>Balance</u> <u>June 30, 2008</u>	<u>Due Within</u> <u>One Year</u>
Accrued Vacation and Sick Leave..	\$ 1,532,588	\$ 170,065	\$ (32,162)	\$ 1,670,491	\$ 32,162
Capital Lease Obligations.....	174,275	40,568	(11,605)	203,238	11,605
Accrued Judgments and Claims.....	281,078	63,259	(56,016)	288,321	72,729
OPEB Obligations	18,689,770	2,152,518	(362,761)	20,479,527	-
TOTALS.....	\$ 20,677,711	\$ 2,426,410	\$ (462,544)	\$ 22,641,577	\$ 116,496

E. Capital Assets

The DOE receives funding for assets from various sources, some of which are combined for the same fixed asset. In addition, many fixed assets are donated or sold to the DOE from private sources. Further, the reception of these assets could be at any of the many central the DOE offices or at one of the over 1,500 school locations. Therefore, a fixed assets schedule by source, location, or use is not presented in this report. However, the overall changes in the various classes of Capital Assets occurring during fiscal year 2009 can be reported, as follows (\$000's omitted):

Department of Education of the City of New York
Notes to the Financial Statements

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

In December 1988, the State of New York Legislation created the SCA for the purposes of designing, constructing, reconstructing, improving, rehabilitating and repairing the New York City public schools. Operations are funded by appropriations made by The City. Such appropriations are guided by Five-Year Capital Plans, developed by the DOE. The City's appropriations for the Five-Year Capital Plan for the fiscal years 2005 through 2009 totaled \$13.1 billion.

Capital Expenditures made on behalf of the DOE amounted to \$2.9 billion and \$2.4 billion in fiscal years 2009 and 2008, respectively. Such expenditures were incurred by the SCA. Upon substantial completion of capital assets, the SCA transfers such assets to the DOE. In Fiscal Years 2009 and 2008, the SCA transferred \$1.7 billion and \$1.4 billion, respectively, in completed assets to the DOE. The SCA capital assets are an integral part of the DOE capital assets.

Included in land and buildings at June 30, 2009 are certain leased properties aggregating approximately \$284 million. Included in equipment are expenditures made from various units of appropriation in the General Fund. Included in Accumulated Depreciations - Buildings & Additions at June 30, 2009 was accumulated depreciation for leases of \$93 million.

Accumulated depreciation is reported as reductions of fixed assets. Depreciation is computed using the straight-line method based upon the estimated useful lives of 40 to 50 years for buildings and 5 to 35 years for equipment.

For Fiscal Year 2009, The City's Comprehensive Annual Financial Report identifies capital expenditures for education amounting to \$2.75 billion. The capital expenditures incurred by the SCA and DDC on behalf of the DOE totaled \$2.908 billion offset by GASB Statement No. 49 expenditures of \$158 million.

4. OTHER INFORMATION

A. Non-Public Schools and Fashion Institute of Technology (FIT)

Expenditures for non-public elementary and secondary schools located within The City, special education pre-school tuition, related services, and transportation and the Fashion Institute of Technology (FIT) are reflected under the financial statement caption Non-Public Schools. Expenditures for non-public elementary and secondary schools are related primarily to textbook purchases, transportation and school lunch programs and are funded, in part, by federal and state aid.

FIT receives, through appropriations provided by the City, a grant from the DOE to partially subsidize its operations. The amounts paid to FIT in Fiscal Year 2009 and 2008 were approximately \$38.2 million and \$37.9 million, respectively.

B. Pensions

Plan Description — On behalf of the DOE, The City sponsors or participates in pension systems providing benefits to the DOE employees. The pension systems function in accordance with existing State statutes and City laws. Each system combines features of a defined benefit pension plan with those of a defined contribution pension plan. Contributions are made by the employer and the employees.

The majority of the DOE's employees are members of one of the following two major pension systems:

1. New York City Teacher's Retirement System-Qualified Pension Plan (TRS), a cost sharing, multiple-employer public employee retirement system, for pedagogical employees in the public schools of the City and Charter Schools and certain other specified school employees of the DOE.
2. New York City Board of Education Retirement System-Qualified Pension Plan (BERS) is a cost sharing, multiple-employer public employee retirement system, for nonpedagogical employees of the DOE and Charter Schools and certain employees of the SCA.

TRS and BERS publish separate annual financial statements that may be obtained from the Office of the Comptroller, Bureau of Accountancy, Pension Accounting Division - Room 803, 1 Centre Street, New York, New York 10007.

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

Funding Policy — The City’s funding policy is to contribute statutorily-required contributions (Statutory Contributions). Together with member contributions and investments income, these Statutory Contributions would ultimately be sufficient to pay benefits when due.

Statutory Contributions, determined in accordance with statute by the systems' Actuary, are generally funded by the employers within the appropriate fiscal year.

Member contributions are established by law and vary by Plan. In general Tier I and Tier II member contribution rates are dependent upon the member’s age at membership and retirement plan election. In general, Tiers III and IV members make basic contributions of 3 percent of their salary regardless of age at membership. Effective October 1, 2000, in accordance with Chapter 126 of the Laws of 2000 these members, except for certain Transit Authority employees, are not required to make contributions after the 10th anniversary of their membership date or completion of ten years of credited service, whichever is earlier. Effective December, 2000, certain Transit Authority Tier III and Tier IV members make basic member contributions of 2.0 percent of their salary in accordance with Chapter 10 of the Laws of 2000. Certain members of NYCERS, BERS and TRS also make additional member contributions.

The City contributes to the above pension systems on behalf of all City-funded personnel positions. The total City actual statutory pension contribution, for the fiscal year ended June 30, 2009, for all City pension systems was \$6.4 billion; \$2.3 billion for the two major DOE systems. The pension costs are not allocated to the DOE or reflected in its financial statements, except that contributions for positions funded through federal and state programs aggregating approximately \$124 million were allocated to the DOE and charged to reimbursable program expenditures.

The annual pension costs for NYCERS, for Fiscal Years ended June 30, 2009, 2008 and 2007 were as follows:

Figure 12

Annual Pension Costs
(In millions)

	2009	2008	2007
TRS	\$ 2,223.6	\$ 1,916.5	\$ 1,600.9
BERS	134.2	143.1	129.8
Total Pension Costs	<u>\$ 2,357.8</u>	<u>\$ 2,059.6</u>	<u>\$ 1,730.7</u>

C. Other Post-Employment Benefits

The New York City Health Benefits Program (Program) is a single-employer defined benefit healthcare plan funded by the New York City Retiree Health Benefits (PLAN), an Other Employee Benefit Trust Fund of the City, which provides Other Postemployment Benefits (OPEB) to eligible retirees and beneficiaries. OPEB includes: health insurance, Medicare Part B reimbursements, and welfare fund contributions. PLAN issues a publicly available financial report that includes financial statements and required supplementary information for funding PLAN’s OPEB and the report is available at: Office of the Comptroller, Bureau of Accountancy—Room 808, 1 Centre Street, New York, New York 10007.

The City’s annual OPEB cost (expenses) is calculated based on the annual required contribution of the employer, an amount that was actuarially determined. For Fiscal Year 2009, the annual OPEB required contribution for The City was determined to be \$67.2 billion of which the City contributed \$1.7 billion to the PLAN. The Net OPEB Obligation, after City Contributions, was \$65.5 billion. For the DOE, the allocated Net OPEB Obligation for Fiscal Year 2009 was \$729 million. This amount was allocated to Programs/Activities’ expenses in presenting full accrual accounting within the Statement of Activities. This amount, when added to the allocated amount for last year (\$20.4 billion), was also included as a long term liability in the Statement of Net Assets (\$21.2 billion).

Department of Education of the City of New York
Notes to the Financial Statements
June 30, 2009

D. Contingencies

As explained in Note 1, the DOE is fiscally dependent upon The City. Accordingly, the DOE's liability for loss contingencies is limited to the extent that spending authority has been appropriated by The City. Such liability, including but not limited to property damage, personal injury and grant disallowances, is assumed by and charged to budget appropriations of The City. A description of material contingencies follows:

(1) Judgments and Claims — The DOE is a defendant in a significant number of lawsuits pertaining to material matters, including claims asserted which are incidental to performing routine educational services and other functions. Such litigation includes, but is not limited to, actions commenced and claims asserted against the DOE arising out of alleged torts, breaches of contracts and violations of law.

(2) Grant Programs — The Office of the Inspector General of the United States Department of Health and Human Services (HHS) has issued audit reports on claims submitted to the New York State Medicaid program by the DOE as well as other school districts in the State during the period between 1990 and 2001 with respect to health-related special education services to children with disabilities. The audits alleged that the State of New York improperly billed the HHS for State Medicaid expenditures for services that were not sufficiently supported by documentation establishing the provision of such services in accordance with applicable standards. The audits asserted that as a result of these alleged problems, the State should return approximately \$770 million of the Medicaid funding. Of the \$770 million amount at issue in the audits, the DOE had received approximately \$270 million. In addition, a lawsuit was filed against the State, the DOE, and others by a relator, and subsequently, joined by the United States Department of Justice (DOJ), under the False Claims Act, which alleged that school districts across the State, including the DOE, had submitted improper Medicaid claims to the Federal government for school-based, health-related services. This lawsuit remained under seal by order of the Federal courts until the sealing restriction was removed in connection with a settlement on July 21, 2009. On July 21, 2009, notwithstanding the City's substantial defenses to the allegations of false claims, the City and the DOE agreed to resolve the outstanding audit issues and settle the lawsuit with the DOJ in a settlement agreement also involving the State and the relator. Of the total \$540 million settlement amount, the State agreed to pay \$440 million over a specified period and the City agreed to pay \$100 million to the Federal government over the next four to five years. Releases received by the City and the DOE from the Centers for Medicare and Medicaid Services of the HHS and the State covered claims for the broader period from 1990 to 2008 though with an exception for certain excluded claims.

(3) Other Contingencies — The DOE has no authority to issue debt obligations. The City issues all debt obligations necessary for educational purposes, principally capital projects. The State Finance Law provides that if The City should default on the payments of principal or interest on bonds or notes issued for school purposes, State aid for education must be withheld by the State and applied to cure such default.

Department of Education of The City of New York
Supplemental Financial Schedules of the General Fund
June 30, 2009

The General Fund is the general operating fund of DOE that is used to account for all of the financial resources, except those required to be accounted for in another fund. The Schedule of Aged Receivables includes Federal, State and Non-Governmental Grants and other aid from Fiscal Year 2005 through Fiscal Year 2009, as of June 30, 2009. The Schedule of Budget and Actual Expenditures reflects the final modified budget as approved by The City. This budget is modified throughout the year and then a final modification is submitted by DOE at year end to distribute surplus balances and to provide additional funding to categories with expenses that are projected to be in excess of budget appropriations. (See Note 2 of the Notes to the Financial Statements)
