

2024-25 Proposed Changes to the School Quality Reports

New York City Public Schools (NYCPS) proposes the following changes to the 2024–25 School Quality Reports (SQR) to support school communities and field/central offices in improving teaching and learning practices.

Please use this [online form](#) (open external link) to share feedback during the open-comment period by **Thursday, June 26**. After considering feedback, NYCPS will publish the Final Changes document describing the 2024-25 School Quality Reports changes.

Summary of Key Changes

Description	Rule for 2023-24	Proposed Changes for 2024-25
Inclusion of the High School College and Career Readiness (CCR) Metric in Ratings	The College and Career Readiness (CCR) metric was introduced as an informational-only metric and did not count toward SQR ratings in the 2023-24 reports.	The CCR metric will now be included in Instruction and Performance ratings for non-charter high schools beginning with the Class of 2025.
Addition of New Predictors to the CCR Metric	AP African American Studies and AP Precalculus were listed as “coming 2025.” Work-based learning experiences were listed as a future enhancement to the metric.	Starting with the Class of 2025, students will earn CCR points in the Technology, Art, and World Languages category for completing the following approved work-based learning experiences: participation in Summer Youth Employment Program, Career Ready Summer Youth Employment Program, Industry Scholars Program, and earning the WBLHR code. Students will also be eligible to earn CCR points in the Social Studies category for AP African American Studies and in the mathematics category for AP Precalculus.
Incorporation of new CUNY GPA data into CCR predictor point values	The point values for each CCR predictor were based on their predictiveness of students’ CUNY GPA given data available for the 2023-24 school year.	The point values for each CCR predictor will be re-evaluated using additional CUNY GPA data from the previous school year. This additional data allows the CCR metric to stay current in its assessment of students’ postsecondary preparedness. The new point values will be included with the unofficial report release later in 2025.
CCR for Transfer High Schools	The CCR metric was not available for Transfer Schools.	The CCR metric for Transfer Schools will be included in the 2024-25 reports on an informational (non-scored) basis. The metrics reported will be similar to the 2018-2024 results recently shared with principals and superintendents.
Survey Mapping Updates	Many New York City School Survey questions were not included in the SQR measures or ratings.	Four new measures have been created: over 20 previously unmapped NSS questions will now be included in rated measures. These questions will be listed in their new categories in the embargoed release of the NYC School Survey results planned for June 2025.
School Quality Reports Product Naming	<p>The names of SQR products varied across reports and platforms.</p> <ul style="list-style-type: none"> School Quality Snapshot, School Performance Dashboard, Public Workbooks (PWB), Leader Workbooks, Scoring Guide, and Student Workbooks 	<p>Product names will follow a consistent naming convention:</p> <ul style="list-style-type: none"> SQR: Snapshot, SQR: Dashboard, SQR: Citywide Results, SQR: District Workbooks, SQR: Scoring Guide, and SQR: Student Workbooks
