INTRODUCTION

Dear Colleagues,

The New York City Department of Education’s academic policy guides consolidate the many requirements for academic programming, assessments, promotion, grading, and student data into one reference document. The transition back to fully in-person learning has been a significant shift for New York City. Students, families, teachers, paraprofessionals, administrators, service providers, and many others in students’ lives have had to overcome enormous challenges. In spite of this, we have not wavered in our commitment to supporting and educating our students and will continue to persevere under extraordinary circumstances.

During this time, our policies must reflect the wide range of experiences and challenges that we are facing as a community. Our goal in publishing the academic policy guides is to provide you with clear interpretations of academic policies and guidance about how to apply them in different scenarios. The academic policy guides are revised each year based on changes to policies and feedback from schools and field staff. This year the academic policy guides are also designed to help schools adapt—not recreate—their policies to meet students' needs as we return to fully in-person learning.

This academic policy guide is just one tool that you may use in providing rigorous academic experiences that considers their individual strengths and needs. Use this guide as a resource as you program and grade students, develop instructional supports and interventions, and set your own school-level policies. As you implement these policies, we encourage you to apply an equity and empathy lens, identifying opportunities to examine how having strong policies, systems, and structures impacts the outcomes of every student.

As you plan for the upcoming school year and beyond, refer to this guide and share it with key members of your school community. This guide, as well as additional resources on policies pertaining to academic requirements and programming, can be found on the Department of Education’s academic policy and systems resource pages on the InfoHub. Please contact your Borough/Citywide Office’s academic policy and systems lead for additional guidance on any of the topics described in these resources, and refer to the news section of the Principal’s Hub for updates.

Sincerely,

Linda Chen
Chief Academic Officer
New York City Department of Education
TABLE OF CONTENTS

INTRODUCTION

TABLE OF CONTENTS

I. KEY SHIFTS FROM PREVIOUS YEARS – NEW SEPTEMBER 2021

II. ACADEMIC REQUIREMENTS – Updated September 2021

A. Program Requirements – Updated September 2021
   1. Grade 6
   2. Grades 7 and 8 – Updated September 2021
   3. Career and Technical Education (CTE)
   4. World Languages (formerly LOTE) – Updated September 2021
   5. Physical Education – Updated September 2021
   6. Health Education – Updated September 2021
   7. Arts Education
   8. Academic Intervention Services (AIS) – Updated September 2021
   9. Response to Intervention

B. Assessments – Updated September 2021
   1. New York State Tests in English, Math, and Science
   2. Second Language Proficiency Exam (SLP) – Updated September 2021
   3. Regents Exams

C. New Students and Grade Placement
   1. Translations

D. Promotion and Grade Level

E. Students Participating in Moving Up Ceremonies

III. COURSE POLICIES AND PROCEDURES

A. Grade 8 Course Acceleration
   1. Option 1: Accelerated Courses at Middle Schools
   2. Option 2: High School Courses

B. Interdisciplinary and Multi-Grade Courses
   1. Courses Addressing Two Subject Areas
   2. Courses with Multiple Grade Levels

C. Online and Blended Courses – Updated September 2021

D. Honors Courses

IV. POLICIES FOR SPECIAL POPULATIONS

A. English Language Learners (ELLs)
   1. New York State Identification Test for English Language Learners (NYSITELL) – Updated September 2021
   2. New York State English as a Second Language Achievement Test (NYSESLAT)

B. Students with Disabilities
   1. New York State Alternate Assessment (NYSAA)
C. Testing Accommodations for English Language Learners and Students with Disabilities – Updated September 2021

D. Home and Hospital Instruction

E. Home Schooling

F. Students in Court-Ordered Settings – Updated September 2021

C. Student Records Retention and Transfer – Updated September 2021
   1. Changes to Student Records

VIII. APPENDICES

A. Unit of Study Programming Estimates – Updated September 2021

B. Course and Exam Marks Table – Updated September 2021
I. KEY SHIFTS FROM PREVIOUS YEARS – NEW SEPTEMBER 2021

In March 2020, Executive Order 202.4 required school to close due to the Novel Coronavirus (COVID-19) pandemic. In an effort to decrease the spread of COVID-19, school buildings remained closed and schools transitioned to a remote learning model for the remainder of the 2019-20 school year (including summer). During that time both NYSED and NYCDOE implemented policies to address the necessary adjustments to our education system. Many of those flexibilities extended into the 2020-21 school year as schools utilized remote and blended learning models.

The 2021-22 school year is a homecoming for students to return for fully in-person learning experiences. With this return, the following are policies that will change and flexibilities that will remain in place to create more equitable and supportive learning environment for students. Many of the policy flexibilities afforded to students due to the COVID-19 pandemic continue to affect them this year and in years to come. They are also addressed in their corresponding sections of this guide.

Unit of Study

- For the 2021-22 school year, schools must provide 180 minutes per week (or 108 hours of instruction per unit). Moving forward, instructional time may continue to include alternative instructional experiences.

Science Lab Requirement

- Flexibility for qualifying for a science Regents exam where students were unable to meet the 1,200 minutes of satisfactory laboratory experiences due to the COVID-19 crisis, applied to the 2019-20 and 2020-21 school years, including the 2020 and 2021 summer sessions. This flexibility is not extended to the 2021-22 school year.
- Students may meet the 1,200 minutes of lab experiences through a combination of hands-on and simulated laboratory experiences.

World Languages (formerly Languages Other Than English [LOTE])

- LOTE standards have been renamed Standards for World languages, and “world languages” should replace the term “languages other than English” in reference to the learning standards, pathway assessment, and course credit.
- “LOTE exam”, which is aligned to Checkpoint B, has been renamed “Comprehensive World Language Exam”.
- "NYCDOE World Language Examinations" will apply to both the Second Language Proficiency Examination (SLP) and the Comprehensive World Language Examination.

Regents and NYCDOE World Language Examinations Waivers

- Students granted Regents waivers are not required to pass such specific exam(s) to meet the assessment requirements for any diploma type (local, Regents, or Regents with advanced designation). Waivers remain with students until they leave high school unless a parent declines them.
- Parents may decline the waiver(s) when their students are eligible to graduate high school as a result of having met an assessment requirement through a Regents waiver(s) due to COVID-19.

Grading

- From March 2020 to August 2021, schools awarded students grades of ‘NX’ (Course in progress) instead of failing marks per the NYCDOE grading policies due to COVID-19. Students who received ‘NX’ grades were provided targeted instruction to meet the learning outcomes for the course within a specific timeframe.
- Beginning September 2021, schools may award failing marks and/or special marks to students who do not meet the learning outcomes of the course. Students receiving special marks must meet specific eligibility criteria.
- When schools transitioned to remote learning due to the COVID-19 pandemic in March 2020, the NYCDOE implemented the parent/guardian choice policy which gave parents/guardians the option to replace their
student’s passing final grades with ‘P’ (pass) to avoid penalizing students for a drop in performance for factors beyond their control. This policy remains in effect for middle school students to provide safeguards as students and families continue to recover from the COVID-19 pandemic and manage other out-of-school challenges.

II. ACADEMIC REQUIREMENTS – Updated September 2021

The New York State Education Department (NYSED) Commissioner’s Regulations, New York City Department of Education (NYCDOE) Chancellor’s Regulations, and supplementary academic policy resources provide guidance on policies pertaining to students in middle school grades, including program requirements, assessments, grading, and promotion.

Middle schools also serving elementary and/or high school grades should refer to the Elementary and High School Academic Policy Guides for information applicable to these grade levels.

For academic policy and systems questions, schools can refer to the academic policy and systems resource webpages, or contact their academic policy and systems leads.

The STARS suite of applications is the NYCDOE’s official record of students’ programs, grades, and progress toward completing academic requirements.\(^1\) STARS reflects academic information for all NYCDOE public school students in grades K–12. STARS data also reflects schools’ alignment to the New York State and New York City academic policies described in this guide. All middle schools must use STARS to enter information about the instruction and supports students are receiving throughout the school day; to reflect student-teacher-subject relationships; and to enter student grades. To ensure that STARS data accurately captures students’ academic programs and outcomes, middle schools must follow the procedures outlined in the Middle School Course Code Directory and on the STARS wiki. STARS is managed by the NYCDOE’s Office of Academic Policy and Systems. See the section of this guide on scheduling in STARS and visit the STARS wiki for more information.

A. Program Requirements – Updated September 2021

NYSED’s Part 100.4 defines the minimum program requirements for students in middle school grades, including required units of study for grades 7 and 8. Part 100.1 defines a unit of study as 180 minutes per week throughout the school year, which is the equivalent of 108 hours of instruction per year.\(^2\) A unit of study is based on the amount of instructional time the student receives from a NYCDOE subject-certified teacher in a course aligned to NYSED learning standards.

Impact of COVID-19 on the Instructional Time Requirements for a Unit of Study: The New York State Education Department issued guidance providing flexibility for courses that previously required specific units of study, including all credit-bearing courses. A unit of study was previously defined as 180 minutes per week throughout the school year, or the equivalent of 108 hours per unit for middle school.

From March 2020 to August 2020 (the end of the 2019-20 school year, including summer school), NYSED waived the instructional time requirement for a student to earn course credit, therefore schools were not required to provide the full 54 hours of instruction per credit. Students were to receive course credit at the end of a course as long as they met the standards and earned a passing grade, per the DOE’s Grading Policy for Remote Learning.

During 2020-21, schools had to use 180 minutes per week (or 108 hours per unit) as a benchmark for comparison when designing and delivering instruction aligned to the learning standards. Principals had to ensure that the instructional experiences as a whole were comparable in rigor, scope, and magnitude to those provided during a traditionally delivered

---

\(^1\) The STARS Suite includes three platforms across grades K–12: STARS Classroom, STARS Client, and STARS Admin.

\(^2\) Most middle schools use an annual term model. These schools maintain a consistent schedule throughout the entire school year and award final grades at the end of the year, in June. See the section of this guide on term models for more information.
Middle School Academic Policy Guide

unit of study of 180 minutes per week. Instructional experiences were not defined solely as a student’s time in front of a teacher or in front of a screen and could include time engaged in standards-based learning under the guidance and direction of a teacher. Schools were not required to deliver exactly 180 minutes per week (108 hours per unit) for required units of study.

The definition of unit of study was amended to allow alternative means of instruction, such as online components, to count toward the 108 hours per unit. “Unit of study means at least 180 minutes of instruction per week throughout the school year, or the equivalent. Equivalent shall mean at least 180 minutes of instructional time per week for instruction delivered in a traditional face to face model or through alternative instructional experiences, including but not limited to through digital technology or blended learning, that represents standards-based learning under the guidance and direction of an appropriately certified teacher. Instructional experiences shall include, but not be limited to: meaningful and frequent interaction with an appropriately certified teacher; academic and other supports designed to meet the needs of the individual student and instructional content that reflects consistent academic expectations as in-person instruction. Any alternative instructional experience must include meaningful feedback on student assignments and methods of tracking student engagement.”

For the 2021-22 school year, schools must provide 180 minutes per week (or 108 hours of instruction per unit). Moving forward, instructional time may continue to include alternative instructional experiences as described above.

The sections below outline the program requirements for grades 6–8. These represent the minimum academic program that a public middle school in New York State must provide. Schools may exceed the requirements and offer supplementary experiences, including advisory, service-learning opportunities, and other youth development courses that will enhance students’ educational experiences and prepare them for the rigor of high school coursework.

It is the policy of the NYCDOE to maintain a safe and supportive learning and educational environment that is free of harassment, intimidation, and/or bullying and free of discrimination because of actual or perceived race, color, creed, ethnicity, national origin, citizenship/immigration status, religion, gender, gender identity, gender expression, sexual orientation, disability, or weight.

See the Guidelines on Gender Inclusion for help implementing gender-inclusive curricula, programs, activities, and practices that are consistent with this policy and with the NYCDOE’s commitment to equity and access. Schools must be mindful that inappropriate gender segregation may result in isolating students, hindering diversity, and/or perpetuating gender stereotypes.

1. Grade 6

Schools must provide students in grade 6 instruction aligned to NYSED intermediate-level learning standards in specific departments. Principals may determine the distribution of time among these subject areas based on their academic program and student needs, with the exception of physical education and health education, and, where student need is established, bilingual education and/or English as a New Language (ENL) instruction.

Schools must provide instruction to all students in the following departments:

- English language arts (ELA), including reading, writing, listening and speaking
- Social studies, including geography and United States history
- Mathematics
- Science and technology
- World Language (formerly language other than English [LOTE])
- Physical education (PE), as described in Part 135.4
2. Grades 7 and 8 – Updated September 2021

In grades 7 and 8, schools must provide students with academic programs that enable them to complete specific units of study in required departments by the end of grade 8. In most cases, instructional time delivered in these departments prior to grade 7 may not count toward the required units of study.\(^5\)

The table below uses units of study to define the requirements.

<table>
<thead>
<tr>
<th>Grade 7 &amp; 8 Subjects</th>
<th>Total required time (1 unit = equivalent of 108 hours)</th>
<th>Additional Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>English language arts</td>
<td>2 units</td>
<td>One unit in grade 7 and one unit in grade 8</td>
</tr>
<tr>
<td>Social studies</td>
<td>2 units</td>
<td>One unit in grade 7 and one unit in grade 8</td>
</tr>
<tr>
<td>Math</td>
<td>2 units</td>
<td>One unit in grade 7 and one unit in grade 8</td>
</tr>
<tr>
<td>Science</td>
<td>2 units</td>
<td>One unit in grade 7 and one unit in grade 8</td>
</tr>
<tr>
<td>Technology education(^6)</td>
<td>1 unit</td>
<td>One unit total, across grades 7 and 8(^7) Technology instruction provided in grades 5 and/or 6 may fulfill this requirement.</td>
</tr>

<tr>
<td>Physical education</td>
<td>1 unit</td>
<td>One half unit (90 minutes per week) in grade 7 and One half unit (90 minutes per week) in grade 8</td>
</tr>
<tr>
<td>Health education</td>
<td>0.5 units</td>
<td>One half unit total, across grades 7 and 8 Health instruction provided in grade 6 may fulfill this requirement.</td>
</tr>
</tbody>
</table>

---

\(^3\) Middle schools often integrate the intermediate level career development and occupational studies (CDOS) learning standards into English language arts, social studies, and other departments.

\(^4\) Courses previously referred to as English as a Second Language (ESL) are now referred to as English as a New Language (ENL). English as a New Language (ENL) courses that meet ELA standards may count toward students’ ELA instructional requirements. See Part 154 and the Policy and Reference Guide for MLs/ELLs for middle school ENL requirements.

\(^5\) As an exception, the health, technology, and home and career skills requirements may be delivered prior to grade 7.

\(^6\) Schools unable to hire teachers certified in technology education and/or home and career skills (FACS) may meet this requirement through any Career and Technology Education (CTE) course. See the CTE section below for additional information.

\(^7\) Schools may integrate the technology learning standards into other courses, provided teachers certified in technology teach the courses.

\(^8\) All students are required to complete two units of study prior to the end of grade 9. One of these units must be completed prior to the end of grade 8.
### Grade 7 & 8 Subjects

<table>
<thead>
<tr>
<th>Subject</th>
<th>Total required time (1 unit = equivalent of 108 hours)</th>
<th>Additional Information</th>

### Impact of COVID-19 on the Instructional Time Requirements for a Unit of Study:

For the 2019-20 and 2020-21 school years, the New York State Education Department issued guidance providing flexibility for courses that previously required specific units of study, including all credit-bearing courses. From March 2020 to August 2020 (the end of the 2019-20 school year, including summer school), NYSED waived the instructional time requirement. For the 2020-21 school year, NYSED allowed schools to use 108 hours as a benchmark for a unit of study.

For the 2021-22 school year schools must provide 180 minutes per week (or 108 hours of instruction per unit). Moving forward, instructional time may continue to include alternative instructional experiences.

### 3. Career and Technical Education (CTE)

Middle schools are required to provide 1.75 units of Career and Technical Education. Schools may offer standalone courses to address CTE learning standards, or they may integrate CTE learning standards into other courses. Since the 2019–20 school year, all middle school students may fulfill the 1.75 units requirement by taking courses in any of the six CTE disciplines (Technology Education, Home and Career Skills (FACS), Trade and Technical Subjects, Business, Agriculture, and Health Sciences), provided an appropriately certified CTE teacher instructs the course.\(^{10}\)

See NYSED’s website for middle-level content modules in each of the six CTE subject areas.

### 4. World Languages (formerly LOTE) – Updated September 2021

The Board of Regents adopted the revised New York State Learning Standards for Languages Other Than English (LOTE)/World Languages on Monday, March 15, 2021. For more information on the changes, implementation timeline, and proficiency ranges aligned to the World Language Checkpoints, see the World Languages Standards and Guidelines.

---

\(^9\) It is recommended that library and information skills be taught by library media specialists and classroom teachers to ensure coordination and integration of library instruction with classroom instruction.

\(^{10}\) As of school year 2017-2018, schools unable to hire teachers certified in in technology education and/or home and career skills (FACS) may meet this requirement through any Career and Technology Education (CTE) course.

\(^{11}\) Schools may integrate family and consumer sciences and/or CDOS learning standards into other courses.

\(^{12}\) NYSED approved an extension for CTE teachers who are certified in grades 7–12 to teach grades 5 and 6 by taking additional coursework. See NYSED’s memo for more information.
Instruction in World Languages may begin as early as kindergarten and must begin no later than the beginning of grade 8, such that all students receive two full units of study by the end of grade 9. Courses in World Languages provided as part of a home language arts (HLA) program satisfy the World Languages requirement.13

While not required, middle schools are encouraged to design their World Languages programs to culminate in the NYCDOE Second Language Proficiency (SLP) exam and afford students the opportunity to earn high school credits toward graduation. This locally-administered exam assesses proficiency of World Language Checkpoint A learning standards and can be used to award high school credit and validate students’ learning experiences when taken after completing an accelerated World Language course in grade 8. Common middle school World Languages models are:

- **Two years of study in World Languages in any elementary or middle school grades, culminating in the SLP exam.** Students who successfully complete these courses and pass the associated SLP exam receive two high school course credits upon transfer into high school.

- **One year of accelerated World Languages study in grade 8, culminating in the SLP exam at the end of grade 8.** Students who successfully complete the course and pass the SLP exam receive two high school course credits. Schools using this model should code these courses using the accelerated middle school World Languages course codes.

NYCDOE Comprehensive World Language exams are aligned to Checkpoint B learning standards and designed to be completed after a full course of study (meaning, three units of study/six credits). If a school determines that students have acquired the proficiency necessary to be successful on the Comprehensive World Language exam, the school can request to administer that exam. However, successfully completing the World Language exam in middle school could affect programming decisions for these students. Schools should contact their academic policy and systems lead to request approval to offer a Comprehensive World Language exam in grade 8.

See the World Languages guidance for information on these policies, and for guidance on how to program World Languages courses in STARS.

5. **Physical Education – Updated September 2021**

Part 135.4 defines the minimum requirements for physical education (PE) for students in middle school grades. Schools must provide students in grades 6–8 with an instructional physical education (PE) program, aligned to NYSED learning standards and the NYC Grades 6-12 PE Scope and Sequence for at least 90 minutes per week throughout the year, every term in middle school.14 PE courses must be taught by a certified, licensed PE teacher. Only teacher-led instructional time may count toward PE. Schools may not count time spent dressing or traveling to an off-site facility toward the PE instructional time requirement.

**Impact of COVID-19 on Physical Education (PE):** In the 2020-21 school year, schools were not expected to meet the traditional frequency requirements (times per week) for PE. Instead, schools were to use the traditional models as a benchmark for comparison in designing schedules for the delivery of PE through blended and remote instruction.

In the 2021-22 school year, students are returning for fully in-person learning experiences. As such, schools must provide physical education instruction based upon the time and frequency requirements in the table below.

---

13 Home language arts (HLA) is formerly known as native language arts (NLA). See the Policy and Reference Guide for MLs/ELLS for more information.

14 The traditional PE scheduling model set by Part 135.4 is known as the “3/2 model,” in which students are scheduled for three days per week in one semester and two days per week in the other semester, or for a comparable time when the school uses a different term model. See the PE guidance document for more information on scheduling and term models.
Summary of PE Time and Frequency Requirements

<table>
<thead>
<tr>
<th>Grade Level</th>
<th>Which PE policies apply?</th>
<th>Minimum required time</th>
<th>Minimum required frequency</th>
</tr>
</thead>
<tbody>

<td>In a 6–8 or 6–12 school</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Grades 7–8</td>
<td>Middle school policies for grades 7–8</td>
<td>90 minutes per week</td>
<td>Every term</td>
</tr>
</tbody>
</table>

PE programs must be designed to meet NYSED learning standards for physical education. PE courses must be taught by a certified, licensed PE teacher. Class size must follow the UFT contract and courses must adhere to all health and safety protocols for physical distancing in physical education. In-person PE requires at least 6 feet of space per student and 12 or more feet for vigorous activity. Please see the NYC Return to School Physical Education Guidelines for more information.

As in all other courses, students’ grades in PE must be based primarily on their content area knowledge and skills, and not on non-mastery measures. Schools may not factor attendance into students’ grades or grade students predominantly on participation or preparedness. See the section of this guide on grading policies and the Grading Policy Toolkit for more details.

NYC FITNESSGRAM is the City’s annual health-related fitness assessment. Schools use NYC FITNESSGRAM assessments to help students identify the importance of healthy fitness zones, set goals, and create long- and short-term fitness plans. Schools may not use performance on this assessment to determine students’ grades. See the NYC Return to School Physical Education Guidelines for more information regarding participation in vigorous activity.

There are no waivers or exemptions from PE requirements in middle school. Students with chronic or temporary medical conditions or disabilities must participate in physical education. Students with temporary medical conditions must provide the school with a medical certificate of limitation that indicates the area of the PE program in which the pupil may participate. Students with chronic medical conditions or disabilities documented by a Section 504 Plan or Individualized Education Program (IEP) must participate in PE in the least restrictive environment, as indicated on their 504 Plans or IEPs, which could include an Adapted Physical Education (APE) program if necessary. An APE program consists of developmental activities, games, sports, and rhythms suited to the interests, capacities, and limitations of the student; it counts as the student’s PE requirement. APE must be taught by a NYCDOE certified PE teacher. Please see the Adapted Physical Education FAQ and Special Education Standard Operating Procedures Manual for additional information.

6. Health Education – Updated September 2021

Part 135.3 defines the minimum requirements for health education instruction, which includes required annual HIV/AIDS lessons in each grade. Schools must provide all middle school students with one half-unit (the equivalent of 54 hours) comprehensive health education course that includes sexual health education. The course must be aligned to NYSED learning standards for health education and must be taught by a certified health education teacher. The NYCDOE strongly
recommends that this course takes place during grades 6 or 7, so that students are adequately prepared to make healthy and informed choices throughout middle school.

Comprehensive health education emphasizes skill development around multiple dimensions of health, including social, emotional, mental, and physical health. It also includes these essential content areas: nutrition and physical activity; alcohol, tobacco and other drug use prevention (including heroin and opioids); sexual health; HIV/AIDS; safety and injury prevention; violence prevention (including child sexual abuse prevention); and other required health areas. The NYCDOE offers free health education training, curricula, and instructional resources for educators Citywide. For more information, see NYSED’s Guidance for Achieving New York State Standards in Health Education and the New York City 6-8 Health Education Scope and Sequence, or contact the Office of School Wellness Programs.

The required sexual health education lessons provide students with medically accurate information and skills to avoid risky behaviors. Parents/guardians may opt out of lessons related to methods of HIV/STI prevention and birth control. The NYCDOE provides schools with a sexual health education notification letter from the Chancellor to distribute to families prior to sexual health education instruction.

In addition to the half-unit of comprehensive health education, schools must provide HIV and AIDS education to every student, every year. The NYCDOE requires schools to provide the following lessons, using the NYCDOE HIV/AIDS Curriculum, which is available through WeTeachNYC.org:

- Five lessons per year for all students in grade 6
- Six lessons per year for all students in grades 7 and 8

Parents/guardians may opt their student out of only the specific HIV and AIDS lessons that include methods of HIV and STI prevention and birth control. Lessons regarding abstinence that do not include other methods of prevention do not qualify for this exemption. The NYDOE designates specific "opt out" lessons in the NYDOE HIV/AIDS Curriculum for each grade level and provides schools with an HIV/AIDS parent notification letter for distribution to families prior to HIV/AIDS instruction. For detailed guidance on providing standards-based health education, review the NYC Health Education Return to School Guidelines.

For more information on academic policies and STARS programming for physical and health education courses, schools should contact their academic policy and systems lead. For more guidance on implementing health education instructional programs, contact the Office of School Wellness Programs. See also the section of this guide on section properties in STARS.

7. Arts Education

Schools may determine the distribution and amount of time spent in arts education (visual arts, music, dance, and theater) for students in grade 6 based on their academic program and student need. To ensure a balanced curriculum, NYSED recommends that students in grade 6 spend ten percent of their time weekly in dance, music, theatre, and visual arts, with certified arts teachers or arts partners using curricula that align to NYS learning standards in the arts.

Schools must provide students in grades 7 and/or 8 with two half-units of instruction (54 hours), taught by a NYCDOE subject-certified arts teacher, in any two of the four arts disciplines (visual arts, music, dance, and/or theater), totaling one unit of instruction (108 hours). Schools may choose to complete the requirement in either grade, or across both grades. For example:

<table>
<thead>
<tr>
<th>Sample Programming Models</th>
<th>Meeting the Requirements Equivalent to 108 hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Option A</td>
<td>Students may take a semester (54 hours) of music in grade 7 and a semester (54 hours) of dance in grade 8.</td>
</tr>
</tbody>
</table>
Option B
Students may take a full year of arts in either grade 7 or grade 8, covering both visual arts (54 hours) and music (54 hours).

Option C
Students may take arts courses consistently throughout middle school:
- Students may take theater twice per week throughout grade 7, for a total of 54 hours; and
- Students may take dance twice per week throughout grade 8, for a total of 54 hours.

Extended day arts instruction may only count towards the arts requirements in grade 7 and/or 8 if taught by a NYCDOE subject-certified teacher and aligns to NYSED Learning Standards in the Arts.

A student may meet the required half unit of study in music by participating in a school’s band, chorus, or orchestra, provided that such participation is consistent with the goals and objectives for the school’s music program for grades 7 and 8.

See the Scheduling in STARS section in this guide for information on how to program arts instruction in STARS.

8. Academic Intervention Services (AIS) – Updated September 2021

Part 100.2( ee) of NYSED general school requirements sets the purposes and requirements of Academic Intervention Services (AIS) for New York State public schools. AIS is defined in Part 1001.1(g) as “additional instruction which supplements the instruction provided in the general curriculum and assists students in meeting the State learning standards ... and/or student support services which may include guidance, counseling, attendance, and study skills which are needed to support improved academic performance.”

NYSED mandates AIS for students with and without disabilities who are not meeting learning standards in English Language Arts, mathematics, social studies, and science, as well as English Language Learners who are not meeting or in danger of not meeting annual Part 154 performance standards. NYSED has approved amendments to Part 100.2 that delineate a two-step process for identifying students who are eligible for AIS. In grades 3–8, principals must provide AIS to students who demonstrate need, as follows:

- First, schools must identify all students, including students with disabilities and ELLs, who scored below the NYSED-designated performance level on one or more of the NYSED assessments in ELA or math. Students who score below the median scale score between level 2 and level 3 are preliminarily eligible for AIS.15
- Then, using additional assessments, schools may make local determinations about which students will most benefit from AIS. Schools must apply the same assessments uniformly across any given grade.

For more information, see this NYSED memo.

Impact of COVID-19 on Academic Intervention Services Identification: Due to limited State testing administration in the 2020-21 school year, NYSED amended section 100.2( ee) of the Commissioner’s regulations to provide that schools may, but are not required to, conduct the two-step identification process for grade 3-8 students during the 2021-2022 school year. Those schools that do not utilize the two-step identification process may make an identification based solely on district-developed procedures applicable to all grade 3-8 students during the 2021-2022 school year. Procedures for the two-step process for the 2021-22 school year are linked on the CIPL Resources page.

Qualified staff in the area of concern must provide services. Appropriate pedagogues include:

- Teachers licensed in the subject area where the student is not meeting performance standards

15 This procedure may also include diagnostic screening for vision, hearing, and physical disabilities.
• Special education teachers  
• Licensed reading teachers  

NYSED also mandates student support services when attendance, social/emotional or study skill problems affect a student’s ability to meet performance standards. A range of staff can provide mandated student support services, including licensed guidance counselors, at-risk counselors (meaning, SAPIS), members of the school attendance team and non-academic staff who contribute to students’ academic success.

For AIS services in a student’s identified area of need, schools must provide instruction supplementary to what is occurring in the classroom. This additional instruction cannot occur during classes required by NYSED academic policy. Scheduling options can include extra periods during the school day, before- and after-school programs, weekend tutorials programs and summer school. Computer-based distance learning is also suitable.

Along with choosing specific content of additional instruction, schools may choose to differentiate the intensity of AIS by changing the length and/or frequency of sessions, as well as the group size. Regular progress monitoring must be part of the AIS program and intervention providers must keep records of interventions used and student academic growth.

Schools must provide written notification to the parents or guardians of students who have been identified to receive AIS; notification must be provided in writing, in English and in the preferred language or mode of communication of the parent, where appropriate. The notification must inform the family of the services the student will receive, the reason the student needs such services, and the consequences of not achieving expected performance levels. The school must also notify parents or guardians when it terminates AIS for a student. Schools do not need parent permission to start or to end AIS.

While the student is receiving AIS, the school must maintain ongoing communication to parents or guardians regarding their child’s AIS program, including:

• Quarterly reports on the student’s academic progress in response to the intervention services  
• At least once per semester, an opportunity to consult with the student's regular classroom teacher(s) and the school staff providing AIS for their child  
• Information on ways to work with their child to improve achievement, monitor their progress, and work

Schools must track academic interventions in STARS in alignment with current STARS programming guidance.

9. Response to Intervention

Response to Intervention (RtI) is a multi-tiered instruction and intervention model that promotes early identification of students in need of additional academic support and, for students not making expected progress, provision of increasing levels of intensity of intervention. Often referred to as a multi-tiered system of supports (MTSS), this protocol involves provision of increased levels of intensity in interventions where students require it. RtI is a form of MTSS, although RtI is typically associated with early-grades prevention models. For students identified for RtI services by a school-wide universal screening assessment, evidence-based instruction, intervention driven by diagnostic assessment, and progress monitoring are provided in increasing levels of intensity needed.

While both AIS and RtI have academic recovery as their goals, the RtI structure seeks to increase the accuracy of referrals to special education services by helping to determine whether learning delays are a result of inadequate instruction or learning disability. It also seeks to ensure that all students have access to high quality, effective, evidence-based instruction and differentiated supports.

New York State requires that all schools provide RtI for students in grade in K–4; New York City extends the mandate to the fifth grade. Although RtI is not a formal requirement in the middle school grades, schools may choose to embed
RtI/MTSS structures into their AIS programs in order to ensure that academic intervention leads to academic recovery and that students are properly identified for special education referral accurately and where warranted.

Schools must track academic interventions in STARS in alignment with current STARS programming guidance.

B. Assessments – Updated September 2021

Students in middle school grades take standardized assessments administered by NYSED in accordance with Federal and State regulations, as outlined below. In addition, schools administer classroom-level assessments throughout the year. Some middle school students take language assessments, like the SLP or Comprehensive World Language exams, which demonstrate knowledge of high-school level content. In addition, students in grades 8 or 9 who wish to apply to New York City’s specialized high schools must take the Specialized High School Admissions Test (SHSAT). See the Assessment InfoHub page for more information.

Impact of COVID-19 on Assessments: In March 2020, NYSED suspended all elementary & intermediate level State testing for the remainder of the 2019-20 school year.

On March 15, 2021, NYSED provided schools additional flexibility in the local in-school scheduling of the Spring 2021 operational tests. For all state assessments, schools were not expected to bring students into the building to participate in the tests if the students were receiving entirely remote instruction during the testing windows. Schools could also administer the tests to students over the full duration of the testing window to accommodate instructional schedules.

1. New York State Tests in English, Math, and Science

In accordance with Federal and State regulations, students in grades 3–8 in New York participate in NYSED’s ELA and math tests each year. Students in grade 8 also participate in the NYSED science test.

Schools administer NYSED ELA and math tests to students according to their grade level. Students with disabilities (those with Individualized Education Programs or Section 504 Plans) and English Language Learners (ELLs) may be eligible to receive testing accommodations on these assessments. Schools must base the decision to provide testing accommodations on a student’s individual needs, and the accommodations must directly address the student’s documented diagnosis, disability, or language need. See the section on testing accommodations for more information.

The following students may be exempt from some or all of these tests:

- Students who participate alternate assessments, such as the New York State Alternate Assessment (NYSAA), rather than standard State tests.
- Recently-arrived ELLs, including students from Puerto Rico, who have attended school in the United States for less than one year, as of April 1 of the year in which the NYSED ELA exam is administered, may be eligible for one, and only one, exemption from the administration of NYSED ELA Exam in grades 3–8.
  - In lieu of the NYSED ELA Exam, schools may administer the New York State English as a Second Language Achievement Test (NYSESLAT) to exempted students for participation purposes only. All other ELLs must participate in both the NYSED ELA Exam and the NYSESLAT. See the Policy and Reference Guide for MLs/ELLs for more information.
- Students in accelerated math courses, who instead must take high school-level Regents exams as their culminating assessments:
  - In an effort to reduce the number of standardized tests that students take, the United States Department of Education has indicated that students in grades 7 or 8 in accelerated math courses who take a Regents exam

---

16 NYSED and NYCDOE refer to English Language Learners (ELLs) as Multilingual Learners/English Language Learners (MLs/ELLs) except in instances referring to state and federal policy.
as a culminating assessment are not required take the NYSED grade-level math test. Schools may not administer both the Regents exams and grade-level exams to these students, except in very rare cases.

- In rare exceptions to the Federal policy, schools may administer the NYSED math assessment in addition to the Regents exam to students in accelerated math courses who also receive instruction in the middle school math learning standards. Schools must follow the process detailed in the double testing waiver guidance if they wish to administer the grade-level tests in addition to the required Regents exams.

- In the event of an exception, where students are scheduled to take both the NYSED math assessment and the Regents exam, schools must provide parent or guardians with timely written notification of their right to opt out of the grade-level math tests. Schools may never require students to take both assessments.

- Students in accelerated science courses (per the NYSED testing manual)

  - School principals may either require or waive the NYSED science test for grade 8 students taking an accelerated science course and who did not take this test during the last school year, but who will be taking a Regents exam in science at the end of this school year based on the instruction provided to students.

  - For those grade 8 students taking an accelerated science course for whom the principal waives the grade 8 science test, the student’s achievement in science will be measured by the student’s performance on the Regents exam in science.

    - Schools may also administer the grade 8 science test to students in grade 7 who, by the end of this school year, will have completed all of the material aligned to the intermediate-level learning standards and are being considered for placement in an accelerated, high-school-level science course when they are in grade 8.

    - Principals have the discretion to include or exclude grade 7 students who meet these criteria. Schools can use the grade 8 science test scores for these grade 7 students to help determine whether students should be placed in accelerated science courses. Students who take the test in grade 7 will not be permitted to take the test again in grade 8. Therefore, caution is advised in administering the test to grade 7 students.

2. Second Language Proficiency Exam (SLP) – Updated September 2021

The Board of Regents adopted the revised New York State Learning Standards for Languages Other Than English (LOTE)/World Languages on Monday, March 15, 2021. For more information on the changes, implementation timeline, and proficiency ranges aligned to the Checkpoints, see the NYS World Languages Standards and Guidelines.

The Second Language Proficiency exams (SLPs) are designed to assess student mastery of the Checkpoint A learning standards for World Languages (formerly known as languages other than English [LOTE]). As a culturally responsive practice, middle schools may administer the SLP exam to students to affirm their experiences in the school’s World Languages programs to receive high school credit, and set them up for appropriate placement as they continue their language study. Students typically take the SLP in grade 8. The NYCDOE offers SLP exams in the following languages:

- Chinese
- French
- German
- Italian
- Spanish

High schools must award high school world language credit to students who pass the SLP exam at the end of a middle school World Languages program after completing courses aligned to Checkpoint A learning standards. See the World...
Languages section of this guide and the World Languages guidance document for additional information on middle school World Languages program options and how to indicate this on the middle school transcript.

3. Regents Exams

NYSED Regents exams assess a student’s mastery of NYSED commencement-level (high school) learning standards in a given subject area. All students enrolled in the course of study leading to a Regents exam have the right to take that exam. Schools may not bar students from taking a Regents exam for disciplinary reasons or because their achievement in a subject is considered unsatisfactory.¹⁷

Regents exams are designed to be culminating exams for high school courses; the NYCDOE recommends that middle schools only register students for a Regents exam after completing an accelerated unit of study in that subject area. The following additional eligibility criteria apply:

- To qualify to take a Regents exam in any of the sciences, a student must successfully complete 1,200 minutes of lab experiences in addition to completing the science course. Students in NYCDOE grade 8 accelerated courses should be scheduled for these lab experiences during the school year.
  - Schools may satisfy the laboratory requirement for science courses designed to culminate in a Regents exam through any combination of hands-on and virtual laboratory experiences, including all virtual labs, provided that students complete satisfactory lab reports.

- Schools wishing to administer the Comprehensive World Language exam or the OHM BOCES World Language exams in middle school, should refer to the World Languages guidance document or contact their academic policy and systems lead for support.

Students who attempt Regents exams in middle school may use those scores towards high school exam requirements. See the section of this guide on Grade 8 Course Acceleration for information about how students in grade 8 can earn high school credit.

Since the 2019–20 school year, all Regents exams scores (passing and failing) appear on students’ middle and high school transcripts.

Impact of COVID-19 on Regents and NYCDOE Comprehensive Examinations: The New York State Education Department (NYSED) cancelled the administration of Regents exams scheduled for June 2020, August 2020, January 2021, and August 2021 as well as most of the June 2021 Regents administrations in response to the COVID-19 pandemic. NYSED provided guidelines for the issuance of Regents and World Language exam waivers so that students were not adversely affected by the cancellation of these exams. These waivers represent a passed exam (equivalent to a score of 65).

Students who meet specific eligibility criteria to receive the Regents, World Language exam, and NYSED-approved +1 waivers can use them toward the assessment requirement for diplomas, credentials, and endorsements. See the applicable Regents Exam Waiver Guidance for eligibility criteria for the June and August 2020, January 2021, and June and August 2021 Regents and World Language exam waivers and how to schedule eligible students for application of the waivers on their transcripts. Regents and/or World Language exam waivers must be reflected on students’ transcripts in alignment with DOE policies and procedures.

¹⁷ See this guidance on School Administrator’s Manual for Secondary Level Examinations.
C. New Students and Grade Placement

Chancellor’s Regulation A-101 outlines the admission, readmission, and transfer policies for all NYCDOE students.

Students entering a NYCDOE middle school for the first time after having attended school outside New York City public schools are placed in a grade level based on the available education records from the student’s previous school at the time of enrollment. If there are no educational records, the student will be placed according to calendar year of birth. If the principal deems that another grade level placement would be more instructionally appropriate, they must submit a grade change request to the superintendent using the ROSA function in ATS and provide evidence to justify any recommendation. The superintendent will make the final decision concerning the appropriate grade level for the student.

The following procedures apply to student grade placement when a student transfers:

- If a student is discharged from a NYCDOE school and returns within the same academic year, the student will be placed based on consideration of the student’s grade placement at their previous NYC school and the available educational records from the student’s last school that are presented at the time of enrollment. If no records are available, the student will be placed in the same grade level as when they were discharged in that academic year.
- If a student is discharged from the NYCDOE and returns to the NYCDOE in a subsequent academic year, the student will be placed the same way as a student enrolling at a NYCDOE school for the first time.
- If a student transfers between NYCDOE schools within an academic year, the student’s grade placement does not change.

See the section of this guide on Promotion and Grade Level for additional information.

NYCDOE middle schools receiving students from other districts should not record grades or assessment outcomes from the student’s previous school in STARS. However, schools should maintain clear policies regarding the extent to which previous academic outcomes factor into final course grades, if at all.

For example, if a student transfers to a NYCDOE school for the first time in the spring of grade 8, the school may choose to incorporate the student’s report card grades from the fall semester into the student’s final course grades. Alternatively, the school may choose to base the student’s final grade only on the work completed by the student at the NYCDOE school in the spring semester. See the Grading Policy section of this guide, the Grading Policy Toolkit, and the Transfer Student Toolkit for more information.

In rare cases, transfer students may have completed high-school-level courses at a previous middle school. In this case, the middle school should place the student into a grade level according to the policies described above, considering opportunities for advanced or accelerated courses where available. The middle school should not award transfer credit for high school courses taken in middle school; however the student’s subsequent high school may choose to award transfer credit for these courses in alignment with the policies described in the Transfer Credit section of the High School Academic Policy Guide.

1. Translations

Schools are responsible for ensuring that transcripts or other key records written in a language other than English are translated effectively so that students can be programmed and served appropriately. Schools may use school- or community-based translators or the student’s home country Embassy or Consulate for assistance. When working with a translation vendor, schools should use the portion of the budget earmarked for translation services.

Schools should never use the student or the student’s family to complete the translation and may not charge them for the cost of translation. Additionally, the NYCDOE’s Translation & Interpretation Unit does not translate student-specific documents.
D. Promotion and Grade Level

Promotion is the process by which teachers determine if students are ready for and have mastered enough content and skills to be successful in the next grade level. The NYCDOE’s student promotion policy, defined in Chancellor’s Regulation A-501, ensures that students have the supports they need to build a strong foundation in math and literacy before entering the next grade level.

In accordance with A-501, schools establish promotion benchmarks, or academic standards, which students must meet in order to advance to the next grade level at the end of the school year. Throughout the year, teachers and principals regularly review students’ academic performance and identify students who, even with additional support and interventions, may be at risk of not meeting the promotion benchmarks for their grade level. Each student’s academic progress is assessed holistically, using multiple measures, such as NYSED test scores, course grades, writing samples, projects, assignments, and other performance-based student work. While NYSED test scores may be considered, they may not be the determining factor in assessing a student’s readiness for the next grade.

Students are held to different promotion benchmarks based on their grade level and, if applicable, their English language learner (ELL) status and/or the criteria specified on their Individualized Education Programs (IEPs). The following groups of students are not held to the promotion standards outlined in A-501:

- Students in pre-kindergarten;
- ELLs in grades 3–7 who have been enrolled in a United States school system (USSS) for less than two years;
- ELLs in grade 8 who have been enrolled in a USSS for less than one year; and
- Students with IEPs who participate in alternate assessments, such as the New York State Alternate Assessment (NYSAA), rather than standard State assessments.

The promotion process includes multiple steps throughout the year, described in greater detail in the Promotion Guide:

- At the beginning of the school year, schools define the promotion benchmarks students must meet in order to be ready for the next grade level and establish the multiple measures they will use to assess students’ progress toward the promotion benchmarks at each grade level.
- In the fall, schools hold parent-teacher conferences and send report cards home to provide early notice to families of how students are progressing.
- In January and February, schools designate students who may be at risk of not meeting promotion benchmarks for their grade level and send written notice (via promotion in doubt letters) to their families.
- In the spring, schools hold parent-teacher conferences and send home report cards to keep families and students aware of their progress and anticipated promotion decision.
- In June, schools make promotion decisions, which they communicate in writing to families.
- In July, students who were not promoted attend summer school.
- In August, schools make final promotional decisions for students in grades 3–8 who were not promoted in June. Families receive written notice of the final promotion decision. Families may appeal these decisions, in writing, and the superintendent makes the final determination.

See the Promotion Guide and the Promotion Policy & Process webpage for information on how to implement the promotion process throughout the school year. For information on how promotion criteria should be determined, applied and evaluated for students with disabilities, refer to the Special Education Office’s promotion page.

In grades 3–8, grade level is determined by the promotion decision entered into ATS. Schools may use ROSA-GRC or ROSA-PAT to appeal promotion decisions and request grade level changes. Schools must submit grade change requests to the superintendent for review; the superintendent makes a final determination. The NYCDOE does not recognize skipping grades as a promotion option.
E. Students Participating in Moving Up Ceremonies

Middle school students must meet promotion benchmarks to participate in their school’s moving up ceremonies. Schools must clearly communicate these expectations to students and families.

A school may prohibit a student who is already on suspension at the time of the moving up activities from attending when they pose a real threat of violence or disruption to the event, but the exclusion must be proportionate to the infraction committed. Schools may also bar a student with particularly egregious conduct from a moving up ceremony, as long as the school has previously advised the student and family in writing.\(^{18}\)

III. COURSE POLICIES AND PROCEDURES

A. Grade 8 Course Acceleration

Per Part 100.4(d), students in grade 8 have the opportunity to earn high school credits in various departments, including English, social studies, mathematics, science, world languages (formerly languages other than English [LOTE]), art, music, and career technical education (CTE). Students in grades 6 and 7 are not eligible to earn high school credit through accelerated courses, except in World Languages.\(^ {19}\)

Most students in grade 8 must pass English, social studies, math, and science courses to be promoted to grade 9, in accordance with NYCDOE promotion policy.\(^ {20}\) Schools must carefully consider the impact that accelerated courses may have on students’ ability to be successful in grade 8, prepare for high school, and be promoted to grade 9.

Middle school principals are responsible for determining which courses to offer for high school credit and which students have demonstrated readiness to pursue such courses. For all accelerated courses, particularly those that typically require multiple years of study and/or are usually completed in grades 11 or 12, principals should consider students’ academic readiness for the course. Additionally, before scheduling students for accelerated courses, principals have the responsibility to consider students’ future high school programming options. Schools should notify students and families of programming needs and how this may inform high school application decisions.

There is no limit to the number of accelerated course credits a student may earn in grade 8, though all accelerated courses must meet instructional time requirements to bear credit (which is 108 hours of instructional time over the course, during grade 8). The following caveats also apply:

- Middle school students may not accelerate PE credits for high school. See the PE guidance document.
- To qualify to take a Regents exam in any of the sciences, a student must successfully complete the equivalent of 1,200 minutes of hands-on or virtual laboratory experiences in addition to completing the science course.

The two ways for grade 8 students to earn two credits for high school-level courses are detailed below. High schools may not refuse to accept accelerated course credits or schedule students to repeat credits that have been appropriately awarded in alignment with NYCDOE and NYSED policies.

---

\(^{18}\) See this guidance on Exclusion from Graduation Ceremonies. Translations are available on the Academic Policy Resources page.

\(^{19}\) See the World Languages section of this guide and the World Languages guidance document for additional information on middle school World Language program options.

\(^{20}\) In rare circumstances, students in grade 8 may be subject to different promotion criteria. ELLs with a status as a student with interrupted formal education (SIFE), ELLs who have been enrolled in a United States School System (USSS) for at least one year but fewer than four years, and students who participate in alternate assessments are held to different promotion criteria. See the Promotion Guide for more information about promotion criteria for students in grade 8.
1. Option 1: Accelerated Courses at Middle Schools

In traditional grade 8 acceleration, students take an accelerated course in middle school aligned to high school-level standards, culminating in a Regents, SLP, or Comprehensive World Language exam in June or August immediately following the course. These students earn credit after passing both the course and the assessment.

For option 1, grade 8 accelerated courses in middle school must:

- Provide students the opportunity for the equivalent of 54 hours of instruction per credit (108 hours of instruction per two credits all year, since most middle schools use an annual term model);
- Address high school (commencement-level) learning standards; and
- Be taught by an NYCDOE teacher certified in the subject area.

Students in grades 6 and 7 are not eligible to earn high school credit through accelerated courses, except in World Languages.

In order to earn high school credit for the course, grade 8 students must pass the accelerated course and earn a specific minimum score. The minimum score that a student needs to earn to receive high school credit after passing the accelerated course depends on the type of exam and if the student has an IEP.

Since school year 2018-19:

- Grade 8 students without IEPs must score 65 or higher on the culminating Regents exam in June or August immediately following the course.
- Grade 8 students with IEPs must score a 55 or higher on the culminating Regents exam in June or August immediately following the course.

For accelerated courses culminating in the SLP or Comprehensive World Language exam, grade 8 students with and without IEPs must pass the accelerated course and score 65 or higher on the culminating SLP or Comprehensive World Language exam.

Impact of COVID-19 on Accelerated Courses at Middle Schools: Due to the cancellation of Regents and World Language exams from June 2020 through August 2021, students who passed courses culminating in these exams were exempted from the exam requirements toward graduation and were eligible to receive high school credit.

Schools must program accelerated courses in STARS using the accelerated course codes and exams described on the STARS wiki; schools cannot modify these course codes in any way. This ensures that the equivalent high school courses and credits appear on the high school transcript, provided the student passes both the accelerated course and Regents exam in the appropriate timeframe.

Since school year 2019–20, all Regents and Comprehensive World Language exam scores (passing and failing) appear on students’ middle and high school transcripts.

After passing a full year of accelerated study (meaning 108 hours) aligned to high school learning standards and the associated Regents or World Language exam, a student earns two high school course credits and can use the passing

---

21 Schools must reach out to their academic policy and systems lead if they wish to offer an accelerated course in a subject that does not culminate in a Regents exam.

22 This change applies only to current and future grade 8 students who are enrolled in an accelerated course. High schools may not retroactively award high school credit to students with IEPs who previously passed a grade 8 accelerated course but earned 55-64 on the culminating Regents exam prior to school year 2018-19.
score toward exam requirements for graduation. Students who successfully complete the SLP as their culminating exam will earn two high school credits but cannot use this exam toward exam requirements for graduation.

High school credit may not be awarded in the following circumstances:

- A student passes the accelerated course but does not earn the required minimum score on the culminating Regents exam in June or August, immediately following the end of the course. Even if the student passes the Regents exam in the following year, the student will not receive high school credit. Schools cannot retroactively award high school credit for Regents-aligned grade 8 accelerated courses.\(^{23}\)
- A student earns the required minimum score on the Regents, Comprehensive World Language, or SLP exam but does not pass the accelerated course(s). The Regents and Comprehensive World Language exam scores will appear on the student’s high school transcript, but they will not receive high school course credit.

2. Option 2: High School Courses

For option 2, an individual eighth grader in a school that does not offer a grade 8 accelerated course (as described in option 1) may attend a course at a high school and earn credit on the same basis as the high school students in that course. Participation in high school courses as an eighth grader should be on a student-level basis; this option is only meant for students who have demonstrated their ability to participate in high school course work and be successful in a high school setting.\(^{24}\) These students will have high school course codes and credits on their high school transcripts. Evidence of the course will not appear on the student’s middle school transcript.

In this scenario, the high school uses the shared instruction (SHIN) function in ATS to enroll the student. The high school then schedules the student using the high school course code and awards grades in STARS.

Since school year 2019–20, all Regents and World Language exams scores (passing and failing) appear on students’ middle and high school transcripts.

B. Interdisciplinary and Multi-Grade Courses

The section below provides policy guidance on the implementation of interdisciplinary and mixed-grade courses. Recording interdisciplinary and mixed-grade courses appropriately in STARS ensures accurate data for student promotion, teacher evaluation, and accountability.

1. Courses Addressing Two Subject Areas

Interdisciplinary programming combines learning standards from two different content areas in a single course. For example, a school may offer a humanities course that integrates both English and social studies standards. The following policies apply to middle school interdisciplinary courses:

- The course must be overseen by a NYCDOE teacher certified in at least one of the two subject areas addressed in the course, provided that the teacher instructs the student population defined by the license area and has demonstrated subject matter competency in both subjects.
- In grades 7 and 8, the interdisciplinary course must align with both of the grade level program requirements. For example, an eighth-grade humanities course covering English and social studies learning standards must provide

\(^{23}\) The one exception is for a World Language course. A student may retake an SLP exam at any point until high school graduation even after having passed a Checkpoint B exam to receive credit for a first year World Language course as long as that credit is not duplicative.

\(^{24}\) Grade 8 students who participate in an accelerated course, comprised of grade 8 students, at a high school must meet the requirements listed in Option 1. For support in scheduling these students in STARS, schools should contact their academic policy & systems lead.
the equivalent of 360 minutes of instruction per week (216 hours per year) in order to satisfy the requirements for one unit of study in each subject area.

- Schools must reflect both subject areas in STARS and award grades accordingly. Schools have two options for scheduling students and awarding grades for interdisciplinary courses:
  o Use the interdisciplinary mechanism to schedule students for a ‘ZJ’ coded course linked to two other subject area course codes. For example, students may be scheduled for a ‘ZJ’ course titled “Humanities,” which is linked to the core English and social studies course codes. Marking period grades should be awarded in the ‘ZJ’ interdisciplinary course. Final grades should be awarded in the subject area course codes upon expansion of the interdisciplinary course at the end of the term. See the STARS wiki and this interdisciplinary guidance document for more information.
  o If the course meets for a double period, schools should schedule students for the two courses separately, using the same teacher for both courses. For example, for a humanities course, students should be scheduled for English during the first period and social studies during the second period. The teacher should award grades for both courses. The grading policy must clearly indicate whether students receive the same grade for both subject areas or whether they are graded separately.

2. Courses with Multiple Grade Levels

Schools may offer mixed-grade courses in a single subject area in order to meet students’ academic needs. For example, a math course may group sixth and seventh grade students with similar math proficiency. The following policies apply to mixed-grade middle school courses:

- A NYCDOE subject-certified teacher whose license area includes the grade levels of all students enrolled in the course must instruct the course.
- Students must take the New York State tests corresponding to their grade levels. For example, sixth-grade students in a mixed sixth- and seventh-grade math course must take the sixth-grade math test. Seventh grade students in the same course must take the seventh-grade math test.
- In grades 7 and 8, the course must align with unit of study requirements described in the section on program requirements.
- The school must use the interdisciplinary table in STARS to schedule students for a ‘ZJ’ coded course linked to the course for both grade levels. For example, in a mixed sixth- and seventh-grade math course, the school must schedule students for a ‘ZJ’ course linked to the core sixth-grade and seventh-grade math course codes. The subject-certified teacher assigned to the course will assign marking period grades in the ‘ZJ’ course and final grades in the grade-level-specific core math course code corresponding to students’ individual grade levels. See the STARS wiki for more information about this table.

C. Online and Blended Courses – Updated September 2021

Middle schools may choose to offer online and blended learning experiences and may incorporate these online courses into their academic programs. These courses are defined by the way instruction is delivered to the student:

- In an online course, students receive their instruction on course content solely through digital and/or Internet-connected media. The course may include teacher-to-student, student-to-student and/or student-to-content interactions, but the instruction itself is fully delivered through media.
- Some schools may choose to use online vendors to deliver instruction virtually. In these cases, the course content is pre-packaged and provided by an external vendor. Students may log on to a vendor-provided website that contains videos and interactive tools, to receive lessons and instruction in a specific subject.
In a blended course, students receive their instruction through a combination of classroom-based learning and through digital and/or Internet-connected media. This may include teacher-to-student, student-to-student and/or student-to-content interactions.

Online and blended courses are regular courses and must meet the same academic policies required of traditional classroom courses.

Online or blended courses that bear credit or fulfill NYSED unit of study requirements must meet the following minimum standards:

- Align with [NYSED learning standards](https://www.nysed.gov) for the subject area, as outlined in the course syllabus;
- Be instructed or overseen by a NYCDOE subject-certified teacher, who monitors the course, provides the student with substantive and regular feedback, awards the final grade, and is the teacher of record in STARS; and
- Meet [instructional time requirements](https://www.nysed.gov), by providing the opportunity for 180 minutes of instruction per week, or 54 hours per credit awarded.

**Impact of COVID-19 on Online and Blended Courses:** In September 2020, the New York State Education Department (NYSED) revised the definition of “unit of study” in Commissioner’s Regulations Part 100.1 (a) to include instructional experiences delivered through digital technology, including online and blended courses. Instructional experiences are not defined solely as a student’s time spent in front of a teacher or in front of a screen, but time engaged in standards-based learning under the guidance and direction of a subject-certified teacher. In the 2020-21 school year, schools could factor the time students participated in online and blended experiences into their instructional time benchmark of 180 minutes per week. Further, students did not need to pass the corresponding Regents exam to receive course credit; students received course credit by meeting the learning outcomes of the course and earning a passing grade, per the school’s grading policy.

For the 2021-22 school year, students are required to pass the corresponding Regents exam at the end of the term, if the student has not already passed an exam that counts toward a diploma in that subject area; this is consistent with the online and blended course policy prior to COVID-19. Students must pass at least one assessment in each of these areas to graduate: ELA, math, science, and social studies. This means that if the student has not already passed an assessment in these subjects, they must do so to demonstrate proficiency and earn credit for the online course. For courses that are part of a sequence, this requirement applies to the last term of instruction in that sequence.

All courses, including courses with content provided by online vendors, must be scheduled in STARS. Schools must code courses with content provided by online vendors like traditional classroom courses, using the standardized [Middle School Course Code Directory](https://www.nysed.gov), and identify online and blended coursework using the [section properties](https://www.nysed.gov); see the [Scheduling in STARS](https://www.nysed.gov) section of this guide for additional information. Schools may not permit students to do a ‘trial run’ of an online or blended course without it being scheduled in STARS. Schools cannot retroactively add an online or blended course to a student’s transcript or change the grade of an online or blended course, unless the rationale meets the explicit criteria outlined in the [Transcript Update Form](https://www.nysed.gov).

**D. Honors Courses**

Schools may offer advanced or honors courses to provide opportunities for students to engage with more rigorous [learning standards](https://www.nysed.gov) in a subject area, expand the scope of the learning standards addressed in core courses, and/or prepare for [course acceleration in grade 8](https://www.nysed.gov).²⁶

---

²⁵ See the [Online and Blended Courses](https://www.nysed.gov) guidance document for additional information about the role of the teacher.

²⁶ [Gifted & Talented (G&T) programs](https://www.nysed.gov) are offered within district elementary schools, beginning in kindergarten and ending in the school’s terminal grade. Therefore, most middle schools do not have G&T programs.
Middle School Academic Policy Guide

Schools have discretion in how they offer honors courses, provided the criteria and expectations for honors courses are clearly documented and communicated to students, teachers, and families. Schools may not use NYSED test scores as the sole, primary, or major factor in determining which students take honors courses. Schools may incorporate report card grades, school-based assessment scores, teacher recommendations, and other measures into their selection criteria.

Students in honors courses are still required to take the NYSED standardized assessments corresponding to their grade levels; see the section on NYSED tests for more information. Additionally, students in honors courses are held to the same promotion standards described in Chancellor’s Regulation A-501 and in the Promotion and Grade Level section of this guide.

Schools must schedule honors courses in STARS according to the standards in the Middle School Course Code Directory (use an ‘H’ in the sixth character). Schools must code honors courses to indicate the grade level of the students taking the course, even if the standards addressed in the course exceed grade-level standards. For example, a grade 7 honors English course that also addresses grade 8 standards must be coded with a ‘7’ in the fifth character to represent that the students are in seventh grade (EENM7H).

IV. POLICIES FOR SPECIAL POPULATIONS

A. English Language Learners (ELLs)

Policies regarding English Language Learners (ELLs) are defined in NYS Commissioner’s Regulation (CR) Part 154. Students are identified as ELLs based on the results of the New York State Identification Test for ELLs (NYSITELL). For additional information on ELL identification and placement, including Students with Interrupted Education (SIFE), see the Policy and Reference Guide for MLs/ELLs.

Once a student has been identified as an ELL, parent selection of an ELL program drives program placement. Parents of ELLs view an orientation video in their preferred language, which describes the NYCDOE’s three program options: Dual Language (DL), Transitional Bilingual Education (TBE), and freestanding English as a New Language (ENL) only, described further in the Policy and Reference Guide for MLs/ELLs. All parents are entitled to choose among these three options, regardless of whether their child’s current school has their program of choice immediately available. The NYCDOE’s website provides a variety of resources for ELL students and families.

Schools may not refuse admission to zoned students or students assigned by the NYCDOE’s Office of Student Enrollment based on their ELL status or program needs.

Schools are required to form bilingual programs in grades K–8 when there are 15 or more ELLs with the same language in one grade or in two contiguous grades, for whom parents/guardians chose a bilingual program placement. This threshold is the minimum requirement under State regulations (CR Part 154), as amended by the ASPIRA Consent Decree, but by no means limits schools that choose to open programs with fewer students. For example, when parents request bilingual programs in a small school, the school can pool resources and staffing with other schools (for example, campus schools and neighboring schools) in order to provide wider access to programs.

For all ELL programs, the number of ENL and Home Language Arts units provided is based on English proficiency and all units must be standards-based. See the Policy and Reference Guide for MLs/ELLs for more information.

27 NYSED and NYCDOE refer to English Language Learners (ELLs) as Multilingual Learners/English Language Learners (MLs/ELLs) except in instances referring to state and federal policy.
1. **New York State Identification Test for English Language Learners (NYSITELL)** – **Updated September 2021**

The NYSITELL is used to initially identify English Language Learners (ELLs). New entrants whose Home Language Identification Survey indicates languages other than English spoken in the home, and who may have English language acquisition needs, take the NYSITELL to determine if they are eligible for bilingual and English as a New Language (ENL) services. Based on NYSITELL results, students are categorized into one of five English proficiency levels:

- Entering
- Emerging
- Transitioning
- Expanding
- Commanding

The student’s level of English proficiency determines the number of service hours they receive. More information is available on NYSED’s website. See the Policy and Reference Guide for MLs/ELLs for more information on ELL services.

**Impact of COVID-19 on NYSITELL:** For school year 2020-21 only, NYSED announced expanded eligibility for NYSITELL and a Special Administration of the NYSITELL for current ELLs unable to take the NYSESLAT due to the COVID-19 pandemic. Please see the 2021 NYSITELL Administration Guide for additional information.

2. **New York State English as a Second Language Achievement Test (NYSESLAT)**

All ELLs take the NYSESLAT every year to determine how well they are learning English and to determine continued eligibility for ELL services as part of the required annual assessment. The NYSESLAT assesses students’ speaking, listening, reading, and writing skills. For more information regarding NYSESLAT administration, see the Policy and Reference Guide for MLs/ELLs.

**B. Students with Disabilities**

Students with disabilities should, regardless of their disability:

- Have access to a rigorous academic curriculum that sets high academic standards, enabling them to fully realize their potential and prepare for independent living, college, and careers.
- To the greatest extent appropriate, be taught and participate in activities with other students with and without disabilities.
- Receive special education services that are targeted to their needs and provide the appropriate level of support throughout the school day.
- To the greatest extent possible, be able to attend their zoned schools or the school of their choice, while still receiving the special education services and supports required.

It is the responsibility of each school to ensure that students with disabilities and their families feel welcome. The School Implementation Team (SIT) facilitates the strategic planning to ensure that every school appropriately and adequately serves all students. The SIT works with other school teams but does not usurp the function of the school-based IEP team.

Students with disabilities who do not require special education services but need health services and/or education accommodations in order to attend school or participate in regular school activities may be eligible for a Section 504 Plan. To determine student eligibility for a Section 504 Plan, a student’s parent or guardian and physician must complete and submit school health forms to the school. The school’s Section 504 team reviews the student’s records and the
physician’s statement to determine accommodations the student is eligible to receive. There are two types of accommodations:

- Health accommodations, which includes administration of medication (for example, asthma and diabetes medication) and medically prescribed non-medication treatment (for example, G-Tube feeding).
- Educational accommodations, which includes testing accommodations (for example, extended time and separate testing location), classroom accommodations (for example, assistive technology), and other academic supports and services.

If approved by the Section 504 team, these accommodations must be provided to the student.

Schools should review each new student’s IEP or Section 504 Plan upon entry. If a student’s IEP or Section 504 Plan recommends programs or services that the school has not previously provided, the school should first make it clear to the parents and student that they are committed to providing the programs and services that are recommended on the IEP or Section 504 Plan, beginning on the student’s first day at that school. For questions related to programming for students with IEPs, schools should contact their Administrator of Special Education (ASE). For questions related to Section 504 Plans, see the Office of School Health’s guidance and Chancellor’s Regulation A-710. For other policies related to students with disabilities, see the sections on testing accommodations, NYSAA, and scheduling in STARS.

A student’s status as a student with a disability, and any information related to their disability, is private information. Schools should ensure that any student records and report cards that may be shared with a third party do not reveal a student as having a disability. For example, schools should not list courses titled as “SETSS” on a transcript.

1. New York State Alternate Assessment (NYSAA)

In accordance with Federal and State regulations, students in grades 3–8 in New York participate in NYSED ELA and math tests each year. Students in grade 4 and 8 also participate in NYSED science tests. NYSAA is an alternate assessment to measure progress and performance in ELA, math, and science for students with severe cognitive disabilities who are unable to participate in standard assessments, even with testing accommodations.

Annually, IEP teams determine the eligibility of students with disabilities who have Individualized Education Programs (IEPs) to participate in standard or alternate assessments. The IEP team determines this eligibility on a case-by-case basis. Students who are eligible for alternate assessments “have limited cognitive abilities combined with behavioral and/or physical limitations and who require highly specialized education and/or social, psychological, and medical services in order to maximize their full potential for useful and meaningful participation in society and for self-fulfillment.”

Eligibility for participation in alternative assessments is not determined by disability classification.

IEP teams should carefully consider this decision, as participating in alternate assessments rather than standard State assessments has long-term implications for students and their families. In high school, students who participate in alternate assessments in lieu of Regents exams for one or more subjects are not eligible to earn an NYS high school diplomas; they instead earn the Skills and Achievement commencement credential.

Students who participate in NYSAA are expected to achieve alternate learning standards. These alternate standards are reduced in scope and complexity. They are intended to enable students to access NYSED learning standards but focus more closely on supporting students for post-secondary life (for example, vocational and life skills).

---

28 See NYSED’s Eligibility and Participation Criteria - NYSAA
29 See section 100.1 (2).(iv.)
Middle School Academic Policy Guide

Schools administer the NYSAA to students according to their chronological age and against grade-level standards set by NYSED. The ELA, math, and science NYSAA exams are computer-delivered adaptive assessments. These measures of achievement:

- Provide eligible students with an alternative way to demonstrate their knowledge and skills.
- Measure students’ progress towards achieving academic goals.
- Support teachers and specialists in adapting instructional strategies and supports.
- Are used by schools as part of their usual classroom assessment practices.

The IEP team documents a student’s participation in alternate assessments in the IEP. The student’s IEP must clearly state why the student cannot participate in standard State assessments and the rationale for participating in alternate assessments. IEP teams must inform families at every IEP meeting, using the parent notification of participation in NYSAA letter, that their child will participate in alternate assessments and if they participate in NYSAA for one or more subjects in high school, they will not be able to meet the requirements for an NYS high school diploma.

See the Alternate Assessment (NYSSA) guidance document for more information on NYSAA policies and procedures.

C. Testing Accommodations for English Language Learners and Students with Disabilities – Updated September 2021

Testing accommodations remove barriers to the test-taking process so that students with disabilities and English Language Learners can demonstrate their knowledge and skills. Testing accommodations do not change the content or skills that tests measure.

Testing accommodations are neither intended nor permitted to:

- Change the skills or content being measured or invalidate the results.
- Provide an unfair advantage.
- Substitute for knowledge or abilities that the student has not attained.

The following students may be eligible for testing accommodations:

- **Students with disabilities** who have IEPs or Section 504 plans, including:
  - Students who have been declassified and have accommodations specified on their “Declassification from Special Education Services” document continue to receive those accommodations until receiving a diploma or aging out at the end of the school year in which the student turns 21 years old.
  - Students who demonstrate disabilities 30 days or fewer before the administration of a State or district-wide assessment may receive certain testing accommodations if authorized by the principal. For example, a student who breaks their arm days before an exam may be approved for a scribe. Such decisions are made by the principal and must be carefully documented with the Borough Assessment Implementation Director (BAID) and the NYSED Office of State Assessment.
- **ELLs** and former ELLs for up to two years after exiting ELL status.

---

30 Students eligible for NYSSA must be assessed on the grade-appropriate content that is consistent with the student’s chronological age. See the birthdate ranges for students participating in NYSSA to determine chronological ages and corresponding grade levels.

31 Accommodations for students who have been declassified are considered at the time of declassification and entered on the declassification plan. Unlike declassification services, testing accommodations can be provided for more than one year or until the testing accommodations are revised or eliminated. Schools should revisit declassified students’ testing accommodations to ensure that the accommodations listed on the declassification plan still meet the student’s changing needs, especially considering the different types of assessments conducted as students progress through the grades. If a change in student need or type of assessment has occurred, a 504 team should convene to create a 504 with the appropriate accommodations for the student.
Decisions to provide accommodations, as well as the specific accommodations themselves, are made on an individual basis and are reflective of individual student needs. Examples of testing accommodations include:

- Flexible test schedules or timing, including extended time and breaks
- Flexible test settings and locations, including smaller group size
- Method of presentation, including test format (such as large print, braille, audio or digital versions of the test)
- Method of test response, including transcription, scribe, or alternative language edition
- Bilingual dictionaries and/or glossaries that provide direct one-to-one translations of words

At the beginning of the school year, schools should determine which testing accommodations benefit individual ELLs and former ELLs so that students become familiar with their specific testing accommodations. For students with disabilities, the IEP or Section 504 team should determine the testing accommodations required for each student at each annual IEP or 504 meeting.

D. Home and Hospital Instruction

Home and hospital instruction programs provide educational services to students who cannot be accommodated in a regular school facility because of a medical or physical condition and/or a severe emotional, psychological, or behavioral disability that prohibits the student from attending school. Home and hospital instruction programs are interim programs, operated by District 75, that provide academic services to limit the educational effects of a long-term absence.

Students who apply to and are approved for home instruction must be affiliated with a New York City school. The affiliate school is the public, parochial, or private school that the student will return to after home or hospital instruction has ended. Students receive home or hospital instruction via “shared instruction,” in which the home or hospital program collaborates with the affiliate school to oversee the students’ instructional program. This ensures continuity of instruction and helps the student maintain a strong connection to the New York City school they will return to after home and hospital instruction has ended.

Within this collaborative relationship, the affiliate school remains primarily responsible for the student’s academic programming, while the home or hospital instruction program is primarily responsible for providing instruction. Specific roles and responsibilities are outlined for schools in the Home and Hospital Instruction guidance document. These responsibilities may change based on the student’s expected duration in home or hospital instruction. A change in responsibilities should be coordinated between the affiliate school and the home or hospital instruction program, specific to each student.

The affiliate school and home and hospital program should keep an open line of communication. This is particularly important as students will return to New York City schools after home or hospital instruction has ended, in order to ensure that the student receives final grades.

For information on student eligibility for home instruction, the process for referring a student to home or hospital instruction, and approval for a student to go on home instruction, see Chancellor’s Regulation A-170 and the Home Instruction Schools webpage. For information on NYCDOE home and hospital instruction policies and implementation, see the Home and Hospital Instruction guidance document.

E. Home Schooling

Families who opt for home schooling should understand that home schooling is governed by a separate set of NYSED policies. Students who are instructed at home may not participate in the instructional programs of the NYCDOE; students either receive home school instruction or receive instruction from an NYCDOE school. Home schooled students are not
issued report cards or academic transcripts. For more information, see the Office of Home Schooling website and the NYSED FAQ on home schooling.

F. Students in Court-Ordered Settings – Updated September 2021

Students who are or have been involved with the juvenile court systems are entitled to specific rights related to their educations:

- The right to enroll in school in a timely manner.
- The right to continue to receive appropriate special education services, where an IEP is in place.
- The right to receive assistance from the NYCDoe in obtaining records and updating the student’s DOE transcript and other records to reflect credits and grades earned while in a non-DOE court-ordered setting. For assistance obtaining students’ records, email reenrollmentsupport@schools.nyc.gov.

For middle school, students in court-ordered settings refers to:

- Students who attend Passages Academy:
  - When students under age 18 are detained in New York City following an arrest, they are under the supervision of the Administration for Children’s Services, Division of Youth and Family Justice (DYFJ) while in detention. These students attend a NYCDoe school at one of the sites of Passages Academy (79X695), a program operated by District 79. ATS will indicate that the student is on Passages Academy’s register.
  - Under the Close to Home Initiative, some students may remain under the supervision of DYFJ after their cases are decided by the Family Court. These students are considered to be in “placement.” Most of these students remain in New York City and attend Passages Academy.

- Students in an Office of Children and Family Services (OCFS) or Administration for Children’s Services (ACS) placement:
  - Some students are placed by the Family Court or Supreme Court in the custody of OCFS, ACS, or OCFS/ACS-contracted facilities (for example, Children’s Village, Greenburgh-Graham, etc.) and receive educational programming from a non-DOE entity.
  - These students are discharged from 79X695 with a discharge code ‘10.’ Upon the end of their court-ordered involvement, students are required to appear at a Family Welcome Center to re-enroll in a DOE school.

See the Transfer Student Toolkit for information about how to support a student’s transition back to their NYCDoe home school.

V. PROGRAMMING AND SYSTEMS POLICIES

The STARS suite of applications is the NYCDoe’s official record of students’ programs, grades, and progress toward completing academic requirements. STARS Classroom, STARS Admin, and STARS Client comprise the STARS suite of course scheduling and grade management applications used by the NYCDoe. STARS Classroom is a web-based application compatible on most browsers that automates the collection of course marks for teachers. Specifically, teachers can use this system to view class rosters, access student data, and enter course marks which will appear on STARS-generated student report cards.

Middle schools have a responsibility to program students towards the most rigorous coursework possible. All NYCDoe middle schools must accurately reflect students’ academic schedules and coursework in STARS. Maintaining accurate student and teacher schedules in STARS ensures schools, students, and families understand how a student is progressing towards graduation. It also reduces data requests from central offices to schools.

32 New York’s Raise the Age (RTA) legislation changed the age that a child can be prosecuted as an adult to 18 years of age in criminal cases in New York State. Prior to RTA, 16- and 17-year-olds were prosecuted as adults.
G. Term Models

Schools must designate a term model in STARS. A term is defined as the length of a course with one syllabus and a final grade and credit(s) earned. Schools may adjust the number of weeks of instruction per term in STARS, as long as they have designated enough instructional days to meet State instructional day and aidable day requirements, as well as individual course instructional time requirements. Individual courses may be shorter than the school’s designated term model. However, schools cannot offer courses that span across multiple terms; courses must begin and end within one term.

Schools may choose from one of four term models:

- **Annual**: about 36 weeks of instruction, in which students remain in a course the entire year and receive final course marks in June. Most middle schools use an annual term model.
- **Semester**: about 18 weeks of instruction, in which the year is divided into two terms
- **Trimester**: about 12 weeks of instruction, in which the year is divided into three terms
- **Cycle**: about 9 weeks of instruction, in which the year is divided into four terms

Term model heavily influences course sequences, student programming and progress to graduation, and the frequency of awarding credits. Schools should not modify the term model frequently and must never adjust the term model during the school year.

H. Scheduling in STARS

A school’s academic program is operationalized through its master schedule. The master schedule contains key information about current course offerings including the teacher of record and locations and meeting days. Each course has the following attributes that can be used in creating both student and teacher schedules:

- Course code
- Section number
- Period
- Cycle (meaning, number of days per week the course meets)
- Capacity (the maximum number of students that can be scheduled in one section)
- Room number
- Teacher name

Once the master schedule is set up, schools can begin to program their students. Schools typically program students using either an individual or block scheduling model, or some combination of the two methods, which are described in brief here:

- **Individual scheduling**: Students are scheduled based on individual needs and requirements. As a result, each student’s schedule is unique. Courses may be scheduled as a daily uniform program or on a rotation cycle.
- **Block scheduling**: Students are grouped according to their needs, or by special program or grade level. Each group follows the same schedule. In some cases, block scheduling may allow for longer periods and normally requires courses to meet on a rotation.

In addition to individual and block scheduling, schools may choose to adopt different instructional approaches in accordance with contractual requirements.
1. Course Codes

Schools indicate the courses they currently offer by designating active course codes. STARS course codes capture information about the subject area, course content and its alignment to NYSED learning standards, the position of a course within a sequence, the instructional level, and delivery model. They are used for student schedules, report cards, transcripts, and NYCDOE data and accountability purposes.

Schools must follow the coding practices detailed in the Middle School Course Code Directory to ensure that course sequences can be interpreted by other NYCDOE schools and NYCDOE tools. The use of the standardized codes outlined in the Middle School Course Code Directory allows users within and outside the school community to understand what the course codes signify. Many NYCDOE reports, tools, and data feeds use the rules established in the Middle School Course Code Directory to inform their business rules.

Middle school accelerated course codes must not contain additional characters after the required accelerated codes.

Prior to building the term’s master schedule, schools should review their course offerings and active codes for the given year and term and ensure the courses will again be available. At this time, schools should also adjust course codes for the current school year and beyond, as needed. Schools must not modify historical course codes, as this can result in the loss of important academic data. As described in the Transcript Update guidance, schools must not complete transcript updates in order to “clean up” or delete and modify historical course codes to better align with the above policies and practices.

Course codes and other attributes like title and credits are set at the course level. The information designated by the code applies to all students in the course and sections receiving that content. Schools may not customize codes for individual sections or students who are sitting in the same class. For support with course coding, schools may contact their academic policy and systems leads.

2. Course titles

Schools also select the title of their courses. These titles appear on students’ transcripts and records, and they are visible to those within and outside of the NYCDOE.

The New York City Department of Education is committed to maintaining a safe and supportive school environment for all students free from harassment, intimidation, and/or bullying and free from discrimination on account of actual or perceived race, color, creed, ethnicity, national origin, citizenship/immigration status, religion, gender, gender identity, gender expression, sexual orientation, disability, or weight.

To support this district-wide commitment, schools should be mindful of what a course title reveals about participating students. Specifically:

- Course titles may never indicate that a course is designed specifically for students with disabilities (for example, courses may not be titled “English Special Ed”).
- Course titles should not identify the gender of students participating in those courses (for example, Girls Health or Boys Choir).

See the Guidelines on Gender Inclusion for help implementing gender-inclusive curricula, programs, activities, and practices that are consistent with this policy and with the DOE’s commitment to equity and access. Schools must be mindful that inappropriate gender segregation may result in isolating students, hindering diversity, and/or perpetuating gender stereotypes.

The additional following guidance applies:
The titles of courses should be easy for an external reader to interpret. Information about the themes and topics covered in required courses can hinder postsecondary institutions’ ability to understand a student’s academic history. This information can be communicated with students and families through course catalogs or other materials.

Courses for which a standard code is not available are generally coded using ‘Q’ in the second character. The titles of these courses should be descriptive so that the reader of the transcript can interpret them. For example, the course “MQS11: Math Topics” does not provide any information about the content of the course and whether it is high-school level, while “MQS11: Pre-Algebra” clearly describes the course content.

Advanced Placement courses must use specific, required course titles; see the AP Courses guidance for additional information.

3. Section Properties

Schools capture additional information about the delivery method and content of the course using section properties. These fields further identify the unique properties of a course/section, including:

- If the course integrates English as a New Language (ENL) within a subject
- The target language of instruction and percent of time in target language
- The special education model
- If the course integrates computer science subjects and is part of the Computer Science for All (CS4All) initiative
- For health education, the number of HIV/AIDS lessons given to the students, during the year and term
- If the course uses iLearn, this section property must be checked for the course to properly connect to iLearn.

In order to ensure students are receiving the instruction to which they are entitled, and to support accurate reporting for compliance, schools must carefully complete the section properties in each year and term and ensure they accurately reflect students’ experiences. For additional support, refer to the following STARS Wiki pages: English Language Learners, Special Education Programming, and Section Properties.

4. Push-in/Pull-out Instruction

Push-in and pull-out instruction occur when a teacher other than the primary teacher(s) delivers targeted instruction to a subgroup of students on a regular basis. Push-in and pull-out instruction can be used to meet a variety of instructional needs including, but not limited to, intervention, enrichment, and services for English language learners and students with disabilities.

Push-in and pull-out instruction must always be programmed in STARS to reflect the content delivered to students. It must be scheduled to reflect the frequency with which the push-in or pull-out instruction occurs. Push-in/pull-out instruction records identify the teacher, the minutes and meet times, the subject of the instruction (using course codes), and any other important properties.

- In push-in instruction, an additional teacher instructs a student or subgroup of students within the primary class. The STARS push-in record should match the subject being delivered in the primary class.
- In pull-out instruction, a student or subgroup of students leaves the primary class to receive instruction outside the classroom from a second teacher.

Integrated co-teaching (ICT) is not considered push-in or pull-out instruction. Instead, this is indicated as a section property.

See the STARS wiki for additional details and instructions for programming push-in and pull-out instruction, programming English Language Learners and special education programming.
VI. GRADING POLICIES AND PROCEDURES

A. Grading Policies – Updated September 2021

All elementary, middle, and high schools must have written grading policies which they review and update annually. Well-documented grading policies facilitate discussion with students and families about academic growth and support students and families in sharing ownership of their learning. School-based grading policies should be developed in consultation with the school community and grounded in the needs of their students. Grading policy documents may be organized in a variety of ways, depending on the extent to which schools’ grading policies are standardized at the school, department, or course level.

Schools must share a physical or electronic copy of their grading policy with students and families at the beginning of the school year. Schools should also share grading policies at open houses, parent-teacher conferences, on the school website, and through other touchpoints with families. Students and families have the right to request the grading policy at any point in time, per the Student Bill of Rights and the Parent Bill of Rights. Schools must translate their grading policies for families when needed.

All grading policies must explain, at a minimum, how grades are determined, the grading scales used, and the timeline of when students receive grades. In addition, schools should have clearly defined procedures to ensure that students’ final course grades are entered in STARS by the end of the term, and in some cases may be entered up to 20 business days (or 4 weeks) after the end of the term for individual students who need additional time.

Schools have discretion in deciding which specific measures are factored into students’ grades. Schools must make determinations of passing or failing based primarily on how well students demonstrate understanding of the subject matter, concepts, content, and skills addressed in a course or subject. Even in courses like physical education (PE), science labs, or electives, students must be graded based primarily on how well they have learned the concepts and subjects being taught.

When students miss class time, teachers should give students reasonable chances to make up missed work before final grades are entered in STARS.

Similar to grading policies and practices in the 2020-21 school year, attendance may not be factored into a student’s grade. Attending school, participating in class, and demonstrating understanding are all essential components of student learning, and school communities must make every effort to ensure that students attend school, with a goal of every student, every day. When students attend school consistently, they have the greatest opportunity to make progress, receive support from their teachers, and demonstrate their learning. Students’ grades must reflect the extent to which they have met the learning outcomes for their courses.

All students, including students with disabilities and ELLs, should be working toward grade-level standards and must receive grades based on mastery of NYSED learning standards.33

- **ELLs**: Grading policies should consider students’ English as a New Language (ENL) proficiency level and should include opportunities for students to demonstrate mastery of NYSED learning standards in their native language.
- **Students with disabilities**: All students, including students with disabilities, should be working toward grade-level standards and should receive grades based on how well they comprehend the content and skills addressed in a course or subject. An Individualized Education Program (IEP) describes specially designed instruction and accommodations for an individual student that creates access to grade-level standards and enables progress

---

33 See the United States Department of Education’s Dear Colleague Letter.
toward annual goals. Students’ receipt of accommodations may not impact the grade that can be earned. Students with disabilities have the same opportunity to earn grades as all other students.

- Schools issue report cards to provide feedback on students’ progress in the general education curriculum and distribute progress reports to reflect the likelihood a student will meet or has already met their annual goals. While progress reports are usually distributed at the same time as report cards, they may not replace report cards for students with disabilities.

- **Students with disabilities who participate in alternate assessments**: Due to the severity of the students’ disabilities, schools modify the general education curriculum to provide students access and allow for participation and progress. Modification changes the expectation of what skills students need to demonstrate they have mastered. To accommodate different expectations, a school’s grading policy should address how they grade students with disabilities who participate in alternate assessments.

**Important**: Given the varied administration schedule of the Regents exams over the course of the COVID-19 pandemic, schools may not use Regents exam scores as a factor in student grades.

For information on how to develop and implement strong grading policies that promote accurate, equitable, and social-emotionally responsive grading, refer to the [Grading Policy Toolkit](#).

### B. Course Marks and Report Cards

Schools determine the total number of marking periods to include within a year depending on the term model they use. Schools must give at least two grades (marks) in each course or subject per term. The last marking period in the term (for example, year, semester, trimester, or quarter, depending on the school’s model) is where final course grades for that term are recorded. Schools should clearly define procedures for calculating and entering final grades in STARS by the end of the term, and in some cases may be entered up to 20 business days (or 4 weeks) after the end of the term for individual students who need additional time.

**Important Terms to Know**

- **Grades** are a reflection of students’ understanding and command of content, their progression through a course or subject, and their mastery of skills at a given point in time.

- **Grading policies** outline when and how students receive feedback on their mastery of content and skills. Schools can address these elements in one or more document(s). Schools are not required to use a specific format when drafting their grading policies. The purpose of a grading policy is to allow students, families, and teachers to have a mutual understanding of what specific grades mean. Schools may establish grading policies at the school, department, grade, or course level, provided the school applies their grading policies equitably to all students.

- **Term** is the length of a course with one syllabus and a final grade. Schools must designate a school-wide term model in STARS before the start of the school year. A school’s designated term model defines the maximum length of any course experience that it may offer. Individual courses may be shorter than the school’s designated term model. Schools cannot offer courses that span across multiple terms; courses must begin and end within one term. The term model a school uses heavily influences student programming.

---

34 For additional information on generating final grades in STARS, see this page on the STARS wiki on Grades and Exams.
35 See the STARS wiki for more information on how to define terms and enter marking period grades.
Marking periods are intervals during a course when the teacher of record awards interim marks, which provide status updates to students, families, and other stakeholders.

Report card grades are indications of students’ progress toward mastery of the course’s learning standards at a given point in time. These are grades that do not appear on the transcript. Report card grades may be standalone or cumulative. They are also often called marking period grades.

Final grades (marks) are given at the end of the term, representing the work students completed over their courses and should reflect the ultimate level of proficiency at the end of the course, as of that point in time. This grade may also confer credit(s) when a course is credit-bearing. The teacher of record determines the final mark in accordance with the school’s grading policies and the City and State’s academic policies.

1. Course Marks – Updated September 2021

All schools are required to enter both interim and final report card grades (course marks) into STARS for grade levels K–12, regardless of the type of report card they choose to use. Schools should enter grades in accordance with their school-level grading policies and in accordance with the Grading Policy Toolkit. Schools are not required to enter indicator marks or narratives if the school is not already using the STARS report card. The marks entered in STARS must accurately match the marks awarded and communicated to students and families.

Schools must award grades using the NYCDOE grading scales in the Course and Exam Marks Tables to ensure that measures of student progress are transparent and translatable across schools. Schools may choose to award grades using one or multiple grading scales, provided the use of each scale is clearly explained in the school’s grading policies. The principal, in consultation with the School Leadership Team (SLT), may determine whether grading scales are set at the school, department, grade, or course level.

Impact of COVID-19 on Course Marks: During the 2019-20 and 2020-21 school years, the New York City Department of Education (NYCDOE) issued grading policies in response to the academic, social, and emotional needs of students, families and educators. While these policies are no longer in effect, schools must be aware of the policies that were in effect during those times, because they may have some carry-over effects, such as whether grades may be included in ranking and how to interpret course marks from last year’s report card to gauge student progress. See the Grading Policy for Remote Learning (2019-20) and the Grading Policy for Remote and Blended Learning Models (2020-21) for details.

The following policies apply to specific course marks:

- **Course in Progress (‘NX’):** Schools must award a grade of Course in Progress (‘NX’) if a student has a documented, extreme extenuating circumstance that prevents them from completing the course in its established timeframe (for example, surgery or a death in the family). ‘NX’ does not have a pass/fail or a numeric equivalent. A student who receives a Course in Progress must successfully complete remaining course requirements by the end of the term following the termination of the course in order to receive a final grade and credit, as applicable.

  Impact of COVID-19 on Course in Progress (‘NX’): At the end of the 2019-20 school year and during the 2020-21 school year, schools had to award a grade of Course in Progress (‘NX’) to middle and high school students in place of failing marks or when there was insufficient evidence to award a grade. A student who received a Course in Progress had to successfully complete remaining course requirements by the dates expressed in the 2020-21 Grading Policy to receive a re-calculated final grade. As a result, the initial ‘NX’ would be changed to a passing final grade if applicable. The ‘NX’ would remain as the final mark for middle school students who did not complete the remaining course requirements by the deadline.
• **New or Recently Admitted Students ('NL'):** Students must award a grade of ‘NL’ to students who enroll in a course after it has started and may have missed assignments or assessments needed to generate a complete course grade for the given marking period. These students may be given a grade of ‘NL’ in STARS to indicate the student did not have the opportunity to demonstrate their understanding of the course content. ‘NL’ does not have a pass/fail or numeric equivalent. Students who receive a grade of ‘NL’ must successfully complete remaining course requirements by the end of the term following the termination of the course in order to receive a final grade and credit, as applicable.

• **No Show ('NS'):** Schools have discretion in using this mark. An ‘NS’ has a pass/fail equivalent of fail and a numeric equivalent of 45. If schools choose to use this mark, it should be reserved for the most egregious situations, where a student has been given multiple chances to make up missed work and the school has made every effort to determine whether a student has extenuating circumstances that are interfering with their education.
  
  o Neither long-term absentees (LTA) nor students receiving hospital or home instruction should be assigned an ‘NS’ mark. See [Home and Hospital Instruction](#) guidance for information on how schools should collaborate with students receiving home or hospital instruction. Schools who have students who are LTAs and have missed more than 20 consecutive school days, must follow the [guidance on using ZLTA codes](#) so that students are not awarded marks.

See the [Course and Exam Marks Tables](#) in the appendix of this document for the full list of grading scales and marks available for middle schools.

### 2. Report Cards

**Report cards** can be generated in STARS for each marking period and must be distributed to students and families at least twice per term: one report indicating the student’s progress and one report indicating the student’s final grades for the term. Schools may use the standard NYCDOE report card and/or school-developed materials to provide students and families with more information about their progress and performance. Schools can refer to the [Student Report Cards](#) webpage for sample STARS report cards, including translations.

All schools are required to enter both interim and final report card grades into STARS for grade levels K–12, regardless of the type of report card they choose to use. Schools should enter grades in accordance with their school-level grading policies. The marks entered in STARS must accurately reflect the marks awarded and communicated to students and families.

### C. Transcript Updates

Schools must have procedures to keep [student transcripts](#) up to date to ensure that students are progressing toward promotion requirements. Schools may complete a transcript update only in specific circumstances. Schools must complete all transcript updates in accordance with the policies listed in the [Transcript Update](#) guidance document by completing the [Transcript Update Form](#) and providing any necessary supporting documentation.

Middle schools may update a student’s final grade for the following reasons:

• Change an existing grade:
  
  o Grade calculation/entry error, in accordance with the course’s grading policy
  
  o Updating a grade of Course in Progress ('NX') or Recent Admit ('NL') to a final grade
  
  o Principal override, in accordance with CSA and UFT contracts (a teacher must be notified in writing of any principal override of final course grades)

• In rare cases, add an exam:
Middle School Academic Policy Guide

- Regents exams taken at a New York State school outside NYCDOE
- NYSED-approved alternatives to Regents exams

Schools must have a signed and completed Transcript Update Form with documentation that supports the change being made before completing the transcript update. Schools cannot perform transcript updates for reasons not specified on the form. They cannot use transcript updates to add courses that were never scheduled and cannot use the transcript update process to modify historical course codes or credit values for individual students. See the Transcript Update guidance for additional information.

D. Calculation of Grade Point Average (GPA) and Rank – Updated September 2021

Schools may determine which courses taken at their school to include in the calculation of student GPA and whether to establish school-based policies for class rankings. Schools are encouraged to consider factors such as equity, motivation, and academic integrity when considering whether to specify an individual student's rank to move away from using grades as a means of comparative student recognition and instead celebrate all students. In cases where class rank is necessary (e.g., to determine a student's eligibility for extracurricular activities), schools should consider designating students as being in the top 10% or top 25% for GPA outside of STARS without assigning each student an individual number/rank in STARS. Schools should share clear, documented policies with students and families that take into consideration which students are eligible to be ranked, which courses count in the ranking, how courses are weighted, and how the final rank will be calculated. In STARS, when calculating the rank, schools can determine which students are included in the denominator by creating a custom group and excluding or including students based on their ranking policy. Schools should complete their ranking prior to discharging students.

VII. ATTENDANCE, DISCHARGE, AND OPERATIONAL PROCEDURES

A. Attendance Policies

Attendance is reporting how many students are in school each day, and the practices to increase the number of students in school each day. Per Chancellor's Regulation A-210, principals are responsible for the school attendance program. See the Attendance Pages on the InfoHub for more information.

1. Administration and Systems

Schools must have systems to take and track attendance and to manage their registers. Good data is the start for improved school-wide attendance. Strong attendance procedures can indicate overall school organization. Schools are expected to:

- Submit complete attendance per Chancellor's Regulation A-210, section III.
- Have routines to check for data accuracy, such as post and check daily attendance for errors each day.
- Ensure that accurate attendance is reflected in ATS once daily attendance is saved in STARS Classroom.
- Follow rules for calendar changes, early dismissals, and releases.
- Account for all students, including the 000 class, immunization exclusions, shared instruction students, and student performers.
- Follow discharge guidelines and complete pending discharges.
- Conduct a thorough clearance of register each September.
- Complete ALOA/ANDI audit each year; compile documents for audit, as required.
• Implement daily attendance monitoring and special outreach for grade PK-8 students who are child-welfare involved per the Tiered Response Protocol.

2. Policy and Practice

Every school must define its own specific policies on attendance and lateness. Schools must publish these policies for staff, students, and families, including: the definitions of lateness; the process for leaving school early; the reasons and documentation required for excused lateness or absences; and how the school is notified of absences or reasons for absences. School attendance policies must be clear on what parents must do to notify the school before and/or after all absences, including extended absences for vacations or family emergencies.

Please note:

• Schools cannot mark a student who has attended at least one instructional period as absent.
• Schools cannot exclude a student due to late arrival.
• Family trips that result in missed instructional time, including extended vacations, count as absences on the student’s record in ATS; Schools cannot discharge students on extended family travel.

Every school must update the OSYD Consolidated Plan annually to define basic administrative procedures. Within the plan, schools must designate an attendance coordinator (administrator or pedagogue) who works with the principal to monitor all procedures for attendance reporting.

Refer to Chancellor’s Regulation A-210, the public webpage on required attendance policies, and the Attendance page for full details.

3. Early Intervention

At the start of the year, schools must begin intervention for students identified as chronically absent in the previous year, or target groups likely to be chronically absent, like students in temporary housing (STH). These students are flagged for support and matched to interventions to prevent further patterns of absence.

Other intervention efforts to follow include:

• Acknowledge all absences with daily phone call and two-way outreach routines.
• Know chronic absentees and act on 5/10 Day Report each Wednesday.
• Group students by cause of absence or type of intervention.
• Plan for common reasons for absences: school refusal, struggling in class, asthma, travel, or pre-k.
• Employ intervention plans, success mentors, and incentives for targeted improvements.
• Have in place procedures to address and prevent STH absences.
• Set ILOG expectations for how the school coordinates outreach.
• Know ways community partners help promote attendance and update the list of local services.

4. Elevated Interventions

A school should keep a log of outreach for each student and there should be one school staff member who “knows the student’s story.” The school must ensure this person:

• Is prepared to address common reasons for extended absences (for example, pregnant/parenting, hospitalizations, or court-involved youth).
• Plans for revised academic programs, remediation, or transitions for affected students.
• Connects students and families to social workers, ACS Preventive Services, Family Assessment Program (FAP), and mental health programs.
• Follows policy for educational neglect.
• Conducts investigations for unexplained, repeated absences, and 407 referrals.
• Documents non-attending reason and continue outreach.
• Consults with shared attendance teacher.

For more information, schools may consult the Attendance page or email attendance@schools.nyc.gov.

B. Discharging Students

The NYCDOE’s Transfer, Discharge, and Graduation Code Guidelines describe the procedures required to discharge students. The guidelines are updated each year to reflect current standards and to increase alignment with the NYSED reporting requirements. School staff members must be properly trained to administer the transfer, discharge, and graduation processes for students. They must collect and store the appropriate documents to support the discharge.

Schools must create a system for collecting, recording, and storing documents related to discharges. Teachers must be encouraged to provide any information that they have received from the child or family about moves, new phone numbers, or addresses. In addition, a process must be established for collecting information about new residence addresses and evidence of a student’s enrollment in a new school. A standard discharge form with quick references to documentation needed for each discharge is available on the discharges InfoHub webpage and in the Transfer, Discharge, and Graduation Code Guidelines.

C. Student Records Retention and Transfer – Updated September 2021

Maintaining up-to-date, accurate student records is an important part of ensuring that students are programmed for the correct courses and exams and receive the services they need. All schools are responsible for obtaining and maintaining relevant records electronically and in students’ cumulative files. See the guidance provided in Records Retention and Disposition Schedule LGS-01, Chancellor’s Regulation A-820, and the Student Records guidance document.

NYCDOE’s data systems automatically transfer the following information to the next NYCDOE school:

• ATS: biographical information, attendance data, health/immunization records, promotion data, disciplinary history, exam scores, and transportation eligibility
• STARS Classroom: students’ previous grades
• SESIS (Special Education Student Information System): IEP

Students’ cumulative files should be transferred as follows:

• For students transitioning from NYCDOE elementary schools to NYCDOE middle schools: elementary schools are responsible for transferring students’ cumulative files to students’ receiving schools each spring once school placement decisions have been finalized. Elementary schools use the PLNT (general education) and PSPE (special education) reports in ATS to access students’ middle school DBNs, and distribute students’ cumulative files accordingly. The PLNT and PSPE reports should be included with the records as a cover sheet. Middle schools can use the ROSA screen in ATS to request missing records as needed.
• For students enrolling from non-NYCDOE schools: schools are responsible for confirming students’ prior schools and contacting the schools to request copies of students’ cumulative files in a timely manner in order to provide students with appropriate academic programs.
• For NYCDOE students transferring to non-NYCDOE schools: schools should send copies of the contents of the cumulative folder to the admitting school; keep the original folder indefinitely.
Impact of COVID-19 on Sharing Student Records: With school buildings closed intermittently to reduce the spread of COVID-19, schools are encouraged to share student records electronically as needed. The NYCDOE developed Guidance for Sharing Student Records with Families During Remote Learning for schools to continue sharing educational records in a secure and confidential manner. This resource provides details on responding to student data requests from families, former students, third parties, etc.

1. Changes to Student Records

The types of documentation required for records change requests differs depending on the type of record that a parent/guardian or student is seeking to update. Before updating a student’s electronic records, schools must receive the appropriate documentation from the student or parent/guardian as described below.

- **Request to correct a student’s date of birth:**
  - Any document accepted as a proof of age for enrollment (for example, birth certificate or passport)

- **Request to correct or change a student’s legal name:**
  - A court order, birth certificate, or other proof of identity reflecting the student’s legal name

- **Request to change a student’s gender:**
  - A birth certificate or government ID reflecting the student’s legal gender OR
  - A signed Name and Gender Change Request Form

Students are be able to change their gender marker and name on their permanent education records without legal documentation by submitting a signed Name and Gender Change Request Form to their school, which must be signed by their parent/guardian if the student is under 18 years of age. The form can be used by all students (for example, transgender and gender expansive students, those who go by a shortened version of their name, or those who have changed their name for social reasons).

A student’s chosen name can be entered or changed in ATS if the parent/guardian—or the student if they are 18 years of age or older—submits a signed Name and Gender Change Request Form to the school. When the student’s chosen first name (‘CFN’) and/or chosen last name (‘CLN’) is entered in ATS, the chosen name(s) will display on most student-, family-, and community-facing materials produced by the DOE in addition to most DOE school-facing applications, such as STARS. If a chosen name is not entered for a student, their “legal” name will continue to display. See the Preferred Student Name (Chosen Name) wiki page for more information.

For students currently enrolled in a New York City school, the school must update the student’s name, gender, and/or date of birth upon receipt of the appropriate documentation described above. Schools should update the student’s gender in the “Sex” field. Currently, schools may only enter “M” for male and “F” for female in ATS. For students who are discharged from the NYCDOE, the student’s last school should forward the request and documentation to their Borough/Citywide Office.

Schools must retain copies of this documentation in the student’s cumulative folder. The former name and/or gender will be maintained in archived data to ensure that records will accurately reflect circumstances in effect at the time each record was created, enable records to be cross-referenced, and maintain confidentiality.

For more information, see the NYCDOE’s Guidelines to Support Transgender and Gender Expansive Students and the guidance on changing name and/or gender in ATS.
a. Records Other Than Permanent Records

No documentation is required to update a name or gender marker in records that are not part of a student’s permanent file, such as guidance logs, moving up ceremony programs, and yearbooks. Schools must use the student’s chosen name and gender in all other records that are not permanent records. For students participating in Public School Athletic League activities, they can update their roster by speaking to their athletic director who will email lgbtq@schools.nyc.gov for support in making this change.

b. School ID Cards

A student’s school ID card is not a permanent record and a school must issue the ID in the name that reflects the student’s chosen name. Student IDs must not have gender markers on them. See this STARS wiki page for step-by-step assistance on updating a student ID without a change in ATS.
VIII. APPENDICES

A. Unit of Study Programming Estimates – Updated September 2021

Schools should design their daily schedule to allow sufficient time to meet unit of study requirements. For middle schools, these benchmarks are defined in Part 100.1 as 180 minutes per week of instruction throughout the school year, or 108 hours per year; more information is outlined in the section of this guide on program requirements.

A unit of study is traditionally based on the amount of instructional time the student receives from a NYCDOE subject-certified teacher in a course aligned to NYSED standards.

The number of minutes of class time each day necessary to meet the unit of study suggested benchmarks in a given year depends on:

- The calendar: the number of instructional days in the year
- The term model: whether a school uses semesters, trimesters, or cycles
- The number of times a class meets per week and/or throughout the year if the schedule cycles
- The day of the week a class meets on and how many of that day occur in the calendar
- The length of each class period

The following page includes examples of minimum class times schools may use to earn one unit of study. The tables assume students are in class no fewer than 180 instructional days in the year. The total number of actual days where students receive instruction will vary, so schools should be conservative in their estimates to be sure they will reach minimum unit of study requirements in any schedules they program for students.

To use these tables, schools should first look up the minimum units of study required for a particular subject. For example, as outlined in the section of this guide on required units of study, schools are required to provide grade 7 and 8 students with two units (108 hours each, for a total of 216 hours) of math. Use the following tables to determine the combinations of period lengths and term models that will allow students to accumulate 216 hours.

**Time Accumulated over One Semester (expressed in total hours, rounded to the nearest hour; days per every 5 class meets)**

B. Course and Exam Marks Table – Updated September 2021

The table below outlines all available grade scales, and their associated marks in STARS, along with their pass/fail equivalents and numeric equivalents.

Note: The 1–4 (+/-) scale does not have numeric equivalents. Schools may not establish nor communicate numeric equivalents for marks 1, 2, 3, or 4. Also, note that performance level 2 has a fail equivalent. Schools that wish to award grades with numeric equivalents or have more gradation between marks should use a different scale of marks.

³⁶ In order to avoid conflicting pass/fail equivalencies for marks of 1–4, schools using the numeric scale should round marks of less than 10 to either an ‘NC’ or a 10 or utilize the ‘NS’ mark where appropriate.
### Course Mark

<table>
<thead>
<tr>
<th>Course Mark</th>
<th>Description</th>
<th>Numeric Equivalent</th>
<th>Pass/Fail Equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>N</td>
<td>Needs Improvement (E–U scale)</td>
<td>65</td>
<td>P</td>

</tbody>
</table>

\(^{37}\) During the transition to remote learning in March 2020, the description of ‘NX’ changed from ‘Incomplete’ to ‘Course in Progress’.

\(^{38}\) With the release of the 2020-21 Grading Policy, the description of ‘NL’ changed from ‘New/Recent Admit’ to ‘New/Recent Admit or Other’.

\(^{39}\) Schools have the option of displaying only the highest Regents exam score on the transcripts of students who have taken Regents exams multiple times.

\(^{40}\) Marks of ABS, INV, and MIS will not appear on transcripts. All Regents exam marks are maintained in the students’ STARS permanent records.
