Log into your Mainframe Application as you normally would.

FAQ #2: When Backspace Button on keyboard does not work in deleting characters.

Click on the three lines on the top left. That will drop down the active Sessions.

Then click on **the pencil**. See the next screenshot.

Click on Keyboard then Options and check box "Operate 3270 Function Backspace as a Destructive Backspace" then click Save.

FAQ #3: To set up your keyboard escape key.

Click on the **three lines on the top left**. That will drop down the active Sessions.

Then click on the **pencil**. See the next screenshot.

Click on Keyboard.
