The survey is aligned to solicit feedback across the six elements of the Framework for Great Schools

- Based on robust research, the six elements of the Framework for Great Schools identify the areas that must improve to increase student achievement.
- By focusing attention and resources on what it takes for schools to function well, the Framework identifies the underlying strengths and weaknesses of a school and shows community members concrete ways to improve student achievement.
- The survey is aligned to the Framework for Great Schools. This year, the survey was further refined to ensure it is soliciting actionable feedback on each school's capacity as defined by the elements.
